SAN FERNANDO VALLEY / SANTA CLARITA VALLEY TRIENNIAL COMMUNITY NEEDS ASSESSMENT

INTRODUCTION

Valley Care Community Consortium (VCCC) is pleased to present our fourth triennial community needs assessment. The 2007 edition of Assessing the Community's Needs: A Triennial Report on the San Fernando and Santa Clarita Valleys represents the collaborative efforts of multiple agencies, including community-based and faith-based organizations, hospitals, clinics, schools, churches, social service agencies, government agencies, elected officials, and other community stakeholders. This is the fourth joint collaborative effort of not-for-profit and public hospitals as well as agencies to assess the health and social needs of Service Planning Area Two (SPA 2). The purpose of this report is to present the community with information regarding the physical and mental health status and needs of the San Fernando and Santa Clarita Valleys (SPA 2) of Los Angeles County. Valley Care Community Consortium (VCCC) focused on collecting primary and secondary data to reflect accurately the current needs of SPA 2. This assessment was prepared in collaboration with hospitals, clinics, schools, community and faith-based organizations, government agencies, and other community stakeholders.

Formed in 1995, VCCC has evolved into the health and mental health-planning agency for SPA 2. With over 200 members and a twenty-member board of directors, programs have been created to serve the underserved populations residing in the San Fernando and Santa Clarita Valleys. VCCC's vision statement is the motivating force behind all joint projects and program development: "Residents of the San Fernando and Santa Clarita Valleys live in healthy communities and have access to a seamless, coordinated health care delivery system." Without the numerous hours spent by the board and VCCC members addressing issues such as diabetes/obesity, environmental health issues, access to health care, mental health, and many other health related concerns, many accomplishments would not have been realized.

Research shows that SPA 2 remains an area where the best of situations and the worst of situations can occur. For example, many residents are well-educated homeowners and have a household income of over \$150,000. However, many residents also earn less than \$15,000, lack high school diplomas, and rent garages, rooms, or are homeless. Unfortunately, it is evident that health, economic, and educational gaps continue to occur in the San Fernando and Santa Clarita Valleys.

According to the San Fernando Valley Economic Report, employment grew 1.9% and payroll grew 5.2%, but inflation lessened that growth, leaving an overall 0.7% increase in purchasing power. This resulted in "transforming a nominal 4.4 percent payroll increase for the County into a 0.1 percent loss in real private-sector payroll in 2005." Interestingly, health care jobs create over 80,000 of the private sector jobs making it the third largest employer in the valley.

A copy of this needs assessment is posted on the Valley Care Community Consortium's web site. Please go to www.valleyccc.org to review or download a copy. For additional information, please contact the needs assessment project coordinator at 818-947-4040 or email at jnovosel@dhs.lacounty.gov.

ACKNOWLEDGMENTS

Many organizations and individuals contributed time, expertise, resources, and financial support to the completion of this project. Special thanks go to the students in the Health Education and Health Administration programs at California State University, Northridge who collected data for this project. Acknowledgments are also extended to Medtronic for hosting the 2007 Needs Assessment Kick-Off Meeting, Providence Saint Joseph Medical Center, Northridge Hospital Medical Center, Neighborhood Legal Services, MEND (Meet Each Need with Dignity), Brand New Day, Valley Care Mid-Valley Comprehensive Health Center, Valley Care Olive View/UCLA Medical Center, and Valley Presbyterian Hospital for hosting our meetings.

Without the financial support of Kaiser Permanente Woodland Hills, Kaiser Permanente Panorama City, and Northridge Hospital Medical Center this community needs assessment would not have been possible. Many thanks go to Kaiser Permanente and Northridge Hospitals for their continued support of VCCC and the triennial report.

VCCC would also like to extend our gratitude to Bill Pitkin, Director of Research, United Way of Greater Los Angeles for sharing zip code data used in their 2007 Zip Code Data Book in advance of them posting it on their website.

The participation and cooperation of the not-for-profit private and public hospitals, in addition to the many organizations, groups, and institutions made this project possible. Some organizations assumed the responsibility of overseeing the development and completion of this project by participating on the Community Needs Assessment meetings. We would like to take this opportunity to acknowledge the many collaborative partners for their support and assistance in the completion of our 2007 needs assessment project. A list of all those who participated in the report is located behind Appendix A.

This needs assessment was made possible by the dedicated work of VCCC staff and partners that worked diligently on data collection and analysis. We would like to recognize the project and data team that played a vital role in the development of the 2007 edition of Assessing the Community's Needs: A Triennial Report on the San Fernando and Santa Clarita Valleys:

Ronald Sorensen	Providence Health and Services Center for Community Health Improvement	Project Oversight
Michael Hickey	Los Angeles County Department of Health Services Office of Planning	Data Committee Chair
Joni Novosel	Valley Care Community Consortium	Project Coordinator
Kavitha Pathmarajah	Los Angeles County Department of Public Health SPA 1 & SPA 2	Data Committee
Robert Steward	Comprehensive Community Health Center	Data Committee
Hsin-I Chen	Tarzana Treatment Center	Project Advisor
Daniel Castellón	Valley Care Community Consortium	Project Staff
Surekha Vasant	Valley Care Community Consortium	Project Staff

VCCC would also like to express our thanks to the committee volunteers that assisted with editing of the document:

Sheri Strahl	The Help Group
Bonnie Bailer	Northridge Hospital Medical Center
Olga Vigdorchik	Los Angeles County Department of Public Health SPA 1 & SPA 2
Kenn Phillips	Economic Alliance
Emily Brownstone	Valley Care Community Consortium

ASSESSMENT METHODOLOGY

The community needs assessment for 2007 applied the methodology of managing and analyzing the data collected to ensure implementation of projects in SPA 2 that identify and answer priority needs effectively. Developed by National Association of City and County Health Officials and the Centers for Disease Control, Mobilizing for Action through Planning and Partnerships (MAPP) employs a community-wide strategic planning tool for improving community health. This process allowed for a more in-depth review and analysis of some of the critical health issues facing SPA 2.

This community needs assessment aims at providing organizations, institutions, social service agencies, government offices, and individual communities with an overview of the San Fernando and Santa Clarita Valleys that comprise SPA 2. The findings of this community needs assessment serve as a chronology and index of health needs and issues prevalent among population groups, including children (aged 0-17), adults (aged 18-64), seniors (aged 65 and over), poor/low income, and medically indigent/uninsured. Similar to the previous community needs assessment studies, the intent of the project focused on collecting both primary and available secondary data that were relevant to the purpose of the investigation.

With the primary data collection, a survey instrument was developed with assistance of agencies participating in the community needs assessment. Agency representatives brainstormed together to identify areas of concern according to the current trends in the communities they served. The identified concerns were then used in the questionnaire. The first part of the survey concentrated on gathering the agencies' location details, services provided, specialty areas, and populations' served. The second part of the needs assessment consisted of ranking the top five priorities out of the 30 issues that were identified and the nine crucial areas where services need expansion or improvement (a copy of the questionnaire is included in the appendices of this report). More than 200 organizations were carefully selected for the interviews to ensure that all of the key target groups identified would be represented as part of the primary data collection. Undergraduate and graduate students from California State University, Northridge assisted with data collection. The students contacted the identified agencies and engaged in person-to-person or phone interviews with each participating organization. These interviews supplemented secondary data and provided missing or unavailable information.

In addition to primary data collection and analysis, our project staff simultaneously researched existing community-based studies corresponding to the interest of community stakeholders. The secondary data sources used for the 2007 Community Needs Assessment project included the following:

- Los Angeles County Office of Education (LACOE), Referral Guide for Homeless Children, Youth, and Families, 2006
- Los Angeles County Department of Public Health (LACDPH), Key Indicators of Health, April 2007
- Los Angeles County Department of Health Services (LACDHS), Office of Planning and Analysis
- Los Angeles County Department of Mental Health (LACDMH), Service Area II SAAC Report
- Los Angeles Police Department Citywide Crime Summary, December 2006

- UCLA Center for Health Policy Research (California Health Interview Survey 2003 and 2005)
- San Fernando Valley Economic Report San Fernando Valley Economic Research Center, California State University, Northridge College of Business Economics
- California Health Care Foundation

A detailed resource listing all of the programs and services provided by those organizations that completed the asset mapping exercise worksheet has been compiled and will be maintained and updated on the VCCC website, www.valleyccc.org. This resource manual, sorted by service and population target, will be a reference for community organizations and stakeholders.

Several maps are provided on the following pages. Figures 1 through 4 identify where services exist in relation to the target population that these organizations serve, with a map key for the agencies behind each map.

- Children (ages 0 to 17)
- Adults (ages 18 to 64)
- Seniors (65 and above)
- Poor and Medically Indigent or Low-Income/Uninsured

ASSET MAPPING

An asset mapping survey was distributed to agencies serving SPA 2 to identify where current services are available. Each asset map provided in this section presents the number of people per census tract in relation to the respondents of the asset mapping survey for agencies serving children (ages 0-17), adults (ages 18-64), seniors (ages 65 and older), and low income populations. LA County Urban Research Division estimates the population in each map according to the 2004 population estimation and projection system. Areas shaded in darkest orange indicate the greatest population per census tract whereas areas shaded in light orange represent a census tract with the lowest population. These maps can be used to form a blueprint of where services and programs are needed. This provides direction for organizations to strategize about expansion and establishment of programs/services into areas of need within SPA 2.

Based on the asset mapping surveys returned, seventy-seven agencies stated that they provide services to children (ages 0 to 17) in SPA 2. A large percentage of the children residing in SPA 2 live in Van Nuys, Glendale, North Hollywood, Pacoima, and Sylmar. Canyon Country and Valencia in the Santa Clarita Valley also consist of a great number of children. A condensed number of service providers for children exist in the southern region of SPA 2, where children are relatively spread out. However, areas in the southwest (from Calabasas through West Hills) and the west central region (from Castaic through Valencia) show a large number of children residing with limited agencies to provide services for this population.

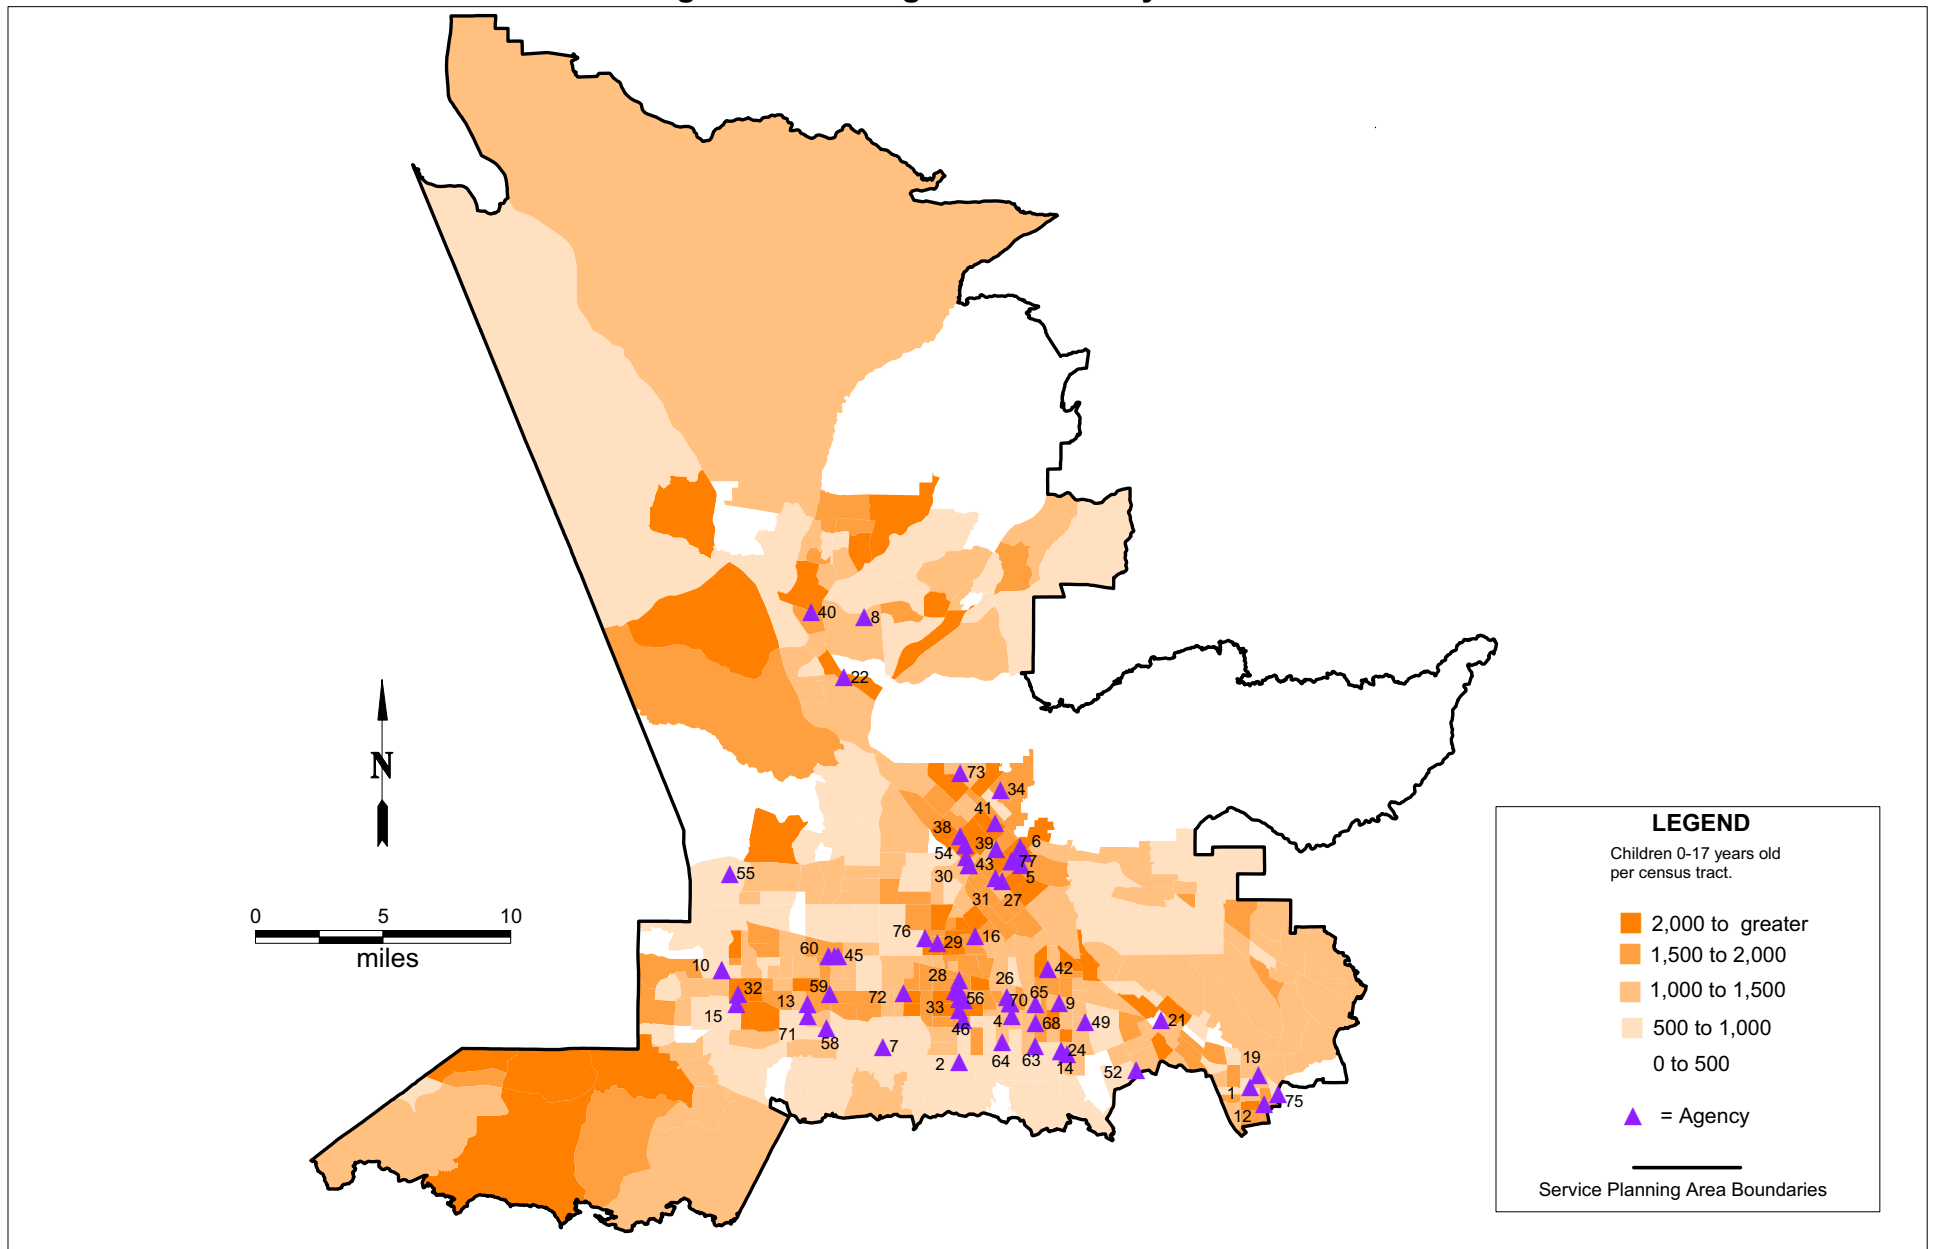

According to the respondents that participated in the survey, seventy-eight agencies provide services to adults (ages 18 to 64) in SPA 2. An extensive number of service providers are located in the southern region of SPA 2. Areas that consist of a large number of adults in the San Fernando Valley are Glendale, Van Nuys, North Hollywood, Burbank, and Pacoima. According to the map for this age grouping, there appears to be adequate service providers for this age group. However, during the 2005 capacity survey conducted by VCCC, some of the clinics serving this area are at capacity for the uninsured; this negatively affects access to care for this target group. In the Santa Clarita Valley, many adults (ages 18-64) reside in Canyon Country, and Valencia. Map areas shaded in dark orange indicate 4,000 or greater adults per census tract on the map; these areas are in the southwest region (from Calabasas through West Hills) and the west central region (from Castaic through Valencia). Based on the agencies on the map, there may not be an adequate proportion of service providers serving seniors in this region. It is important to note that there was a very limited response rate from the Santa Clarita Valley area; therefore, this assumption may be flawed.

Additionally, sixty-nine agency respondents stated that they provide services to seniors (age 65 and older). A majority of services for elderly are located in the southern region of SPA 2. Burbank is one of the top three communities showing a large senior population; however, there appears to be a limited number of agencies serving seniors in Burbank. Canyon Country is the second largest area with a high population of seniors in Santa Clarita Valley.

Seventy-four agencies responding provide services to the low-income population with annual household incomes below 200% of the federal poverty level. Van Nuys, Glendale, Pacoima, North Hills, and Canoga Park are the communities in the San Fernando Valley where a large percentage of families live below 200% of the federal poverty level. In the Santa Clarita Valley, two communities show a large portion of their residents living below 200% of the federal poverty level: Canyon Country and Newhall.

The maps on the following pages identify where services exist in relation to the target populations that these organizations serve. Note that not all SPA 2 agencies completed and returned the asset-mapping tool; therefore, there are additional agencies servicing each of the target groups assessed. For detailed information on each agency participating, please go to the resource directory located on the VCCC website at www.valleyccc.org.

DEMOGRAPHIC PROFILE

Service Area Description

SPA 2 encompasses 999.24 square miles and is the largest of the eight service planning areas. SPA 2 consists of thirty-six cities and sixty-five zip codes. In the San Fernando Valley, SPA 2 extends from Sylmar/Tujunga in the north, Agoura Hills/Calabasas to the west, Glendale/Burbank to the east, and Studio City/Sherman Oaks/Encino/Tarzana to the south. Bordering the San Fernando Valley to the north, the Santa Clarita Valley includes the communities of Canyon Country, Castaic, Newhall, Saugus, Stevenson Ranch, and Valencia. In excess of two million people live in the San Fernando and Santa Clarita Valleys (SPA 2).

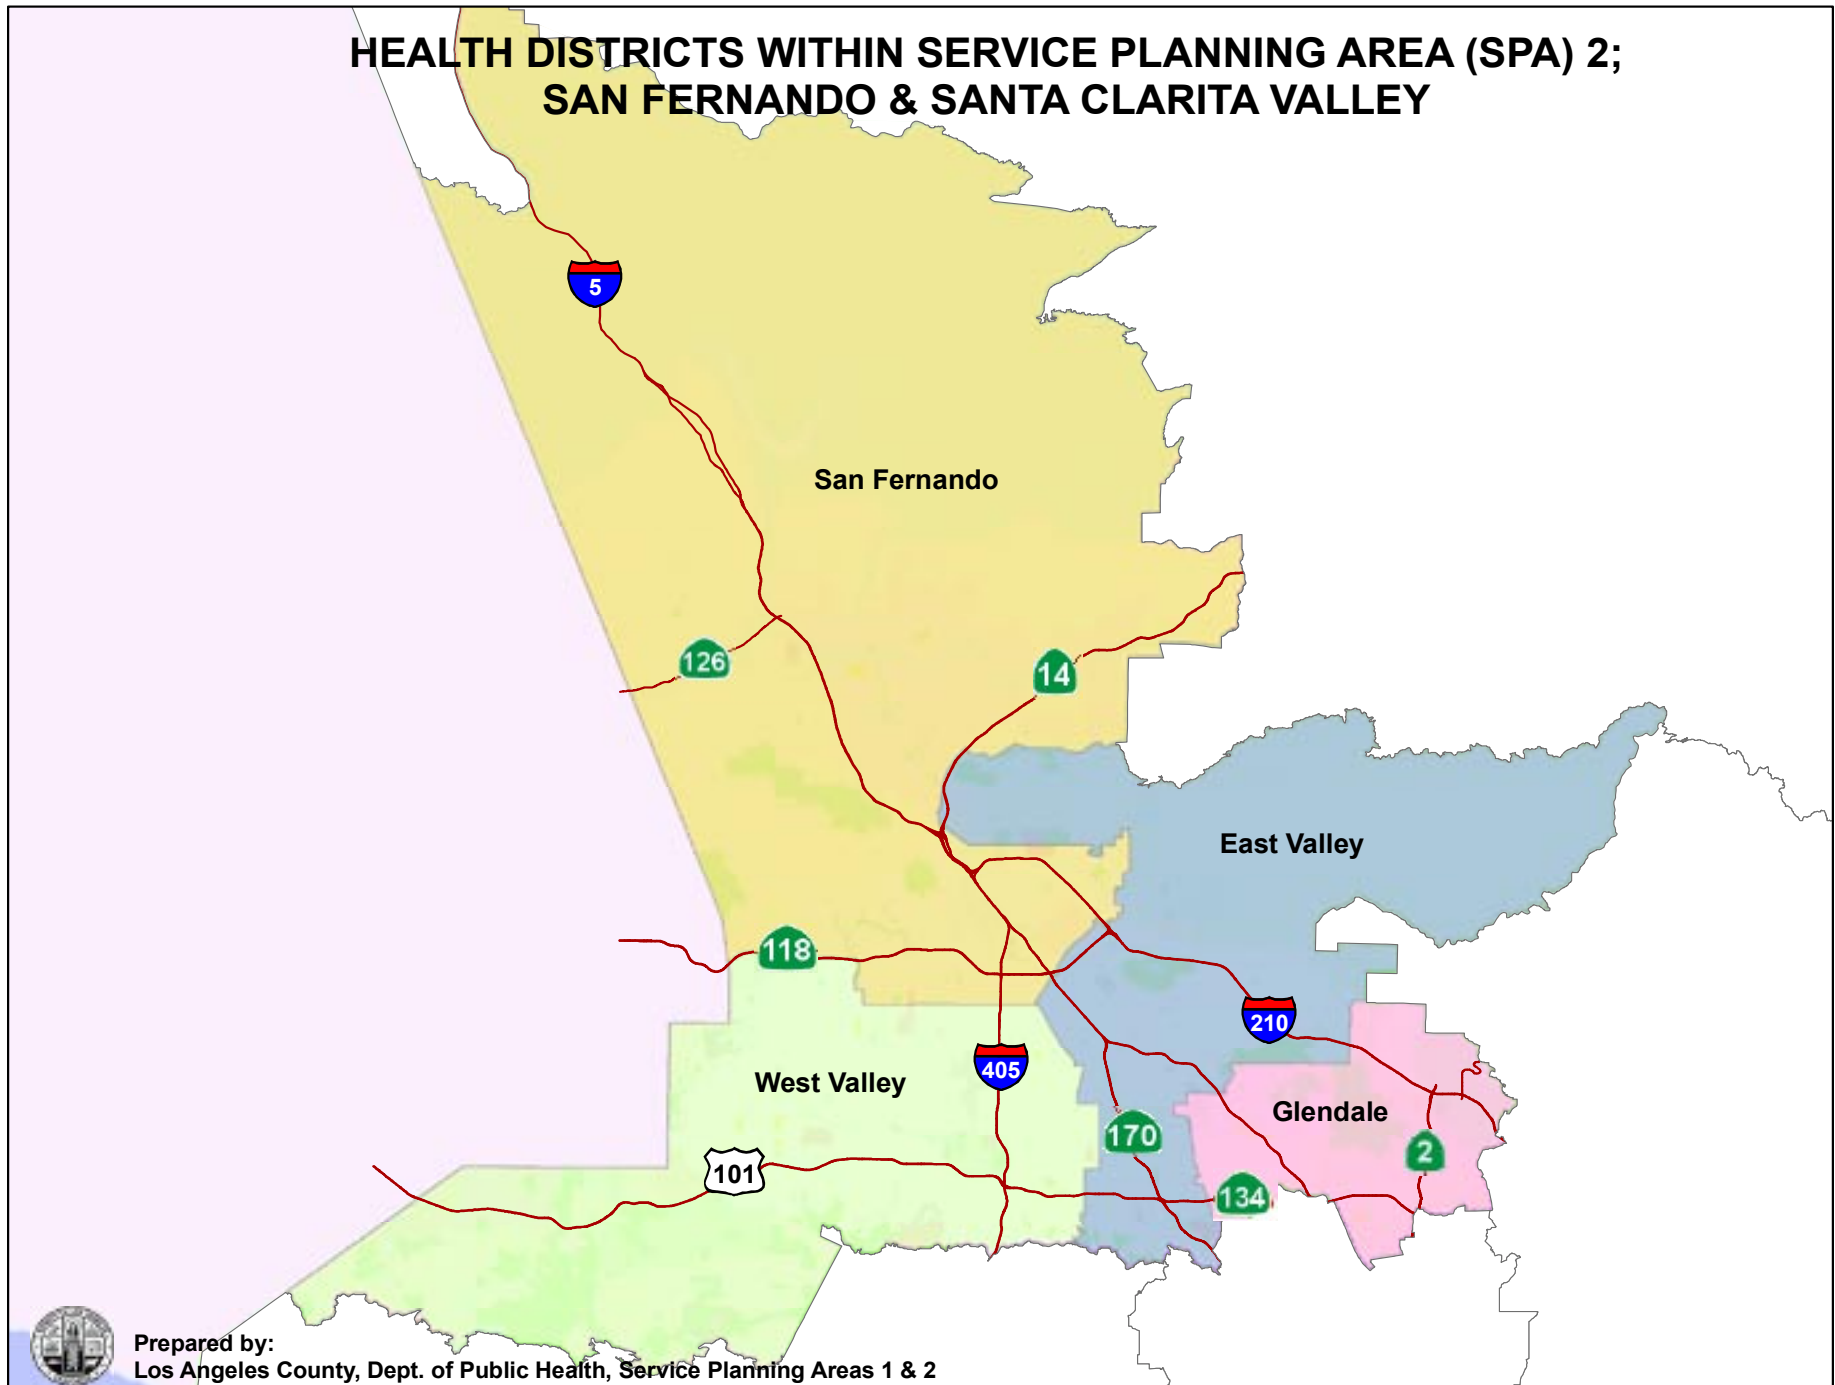

Based on 2004 population estimates, California leads all other states in population (35,893,799); and Los Angeles County with a population of (10,174,823) has more residents than forty-three states. SPA 2 has a population of 2,108,367.

Los Angeles County	10,174,823
SPA 2 San Fernando & Santa Clarita Valley	2,108,367
SPA 3 San Gabriel	1,846,997
SPA 8 South Bay	1,596,245
SPA 7 East	1,369,589
SPA 4 Metro	1,240,204
SPA 6 South	1,031,700
SPA 5 West	646,770
SPA 1 Antelope Valley	334,951

Source: Key Indicators of Health Los Angeles County Department of Public Health-April 2007
U.S. Bureau of the Census, 2004 data.www.census.gov OR www.infoplease.com/ipa/A0004986.html
July 1, 2004 Population Estimates prepared by WRMA for LA County CAO, 6/20/2005

The eight service planning areas were created to serve as the basic geographical organization units for community health services under Public Health. Within SPA 2, there are four health districts including East Valley Health District, Glendale Health District, San Fernando Health District, and the West Valley Health District. (For the actual geographic boundaries of SPA 2, see the map on the next page). According to the Los Angeles County Department of Public Health, the geographic boundaries of the health districts correspond to the Census Tract boundaries established by the Census Bureau, not the United States Postal Service. For this report, the data will be reported one of two ways: either by zip code based on the United States Postal Service with the understanding that some of the zip codes may span into other health districts, or by census tract boundaries grouped by health district.

POPULATION PROFILE

SPA 2 Populations

The population of SPA 2 consists of two distinct social, cultural, and economic areas: the San Fernando Valley and the Santa Clarita Valley. Over 1.8 million people live in the San Fernando Valley (SFV), while the Santa Clarita Valley (SCV) includes a growing population of over 243,000 people. An examination of the population size and growth, race and ethnicity, household income levels, age, and education level provides a framework useful to identify specific communities within this study as well as local priority needs and issues.

Population Size:

The largest population centers in the San Fernando Valley: (Total Population: 1,871,762)

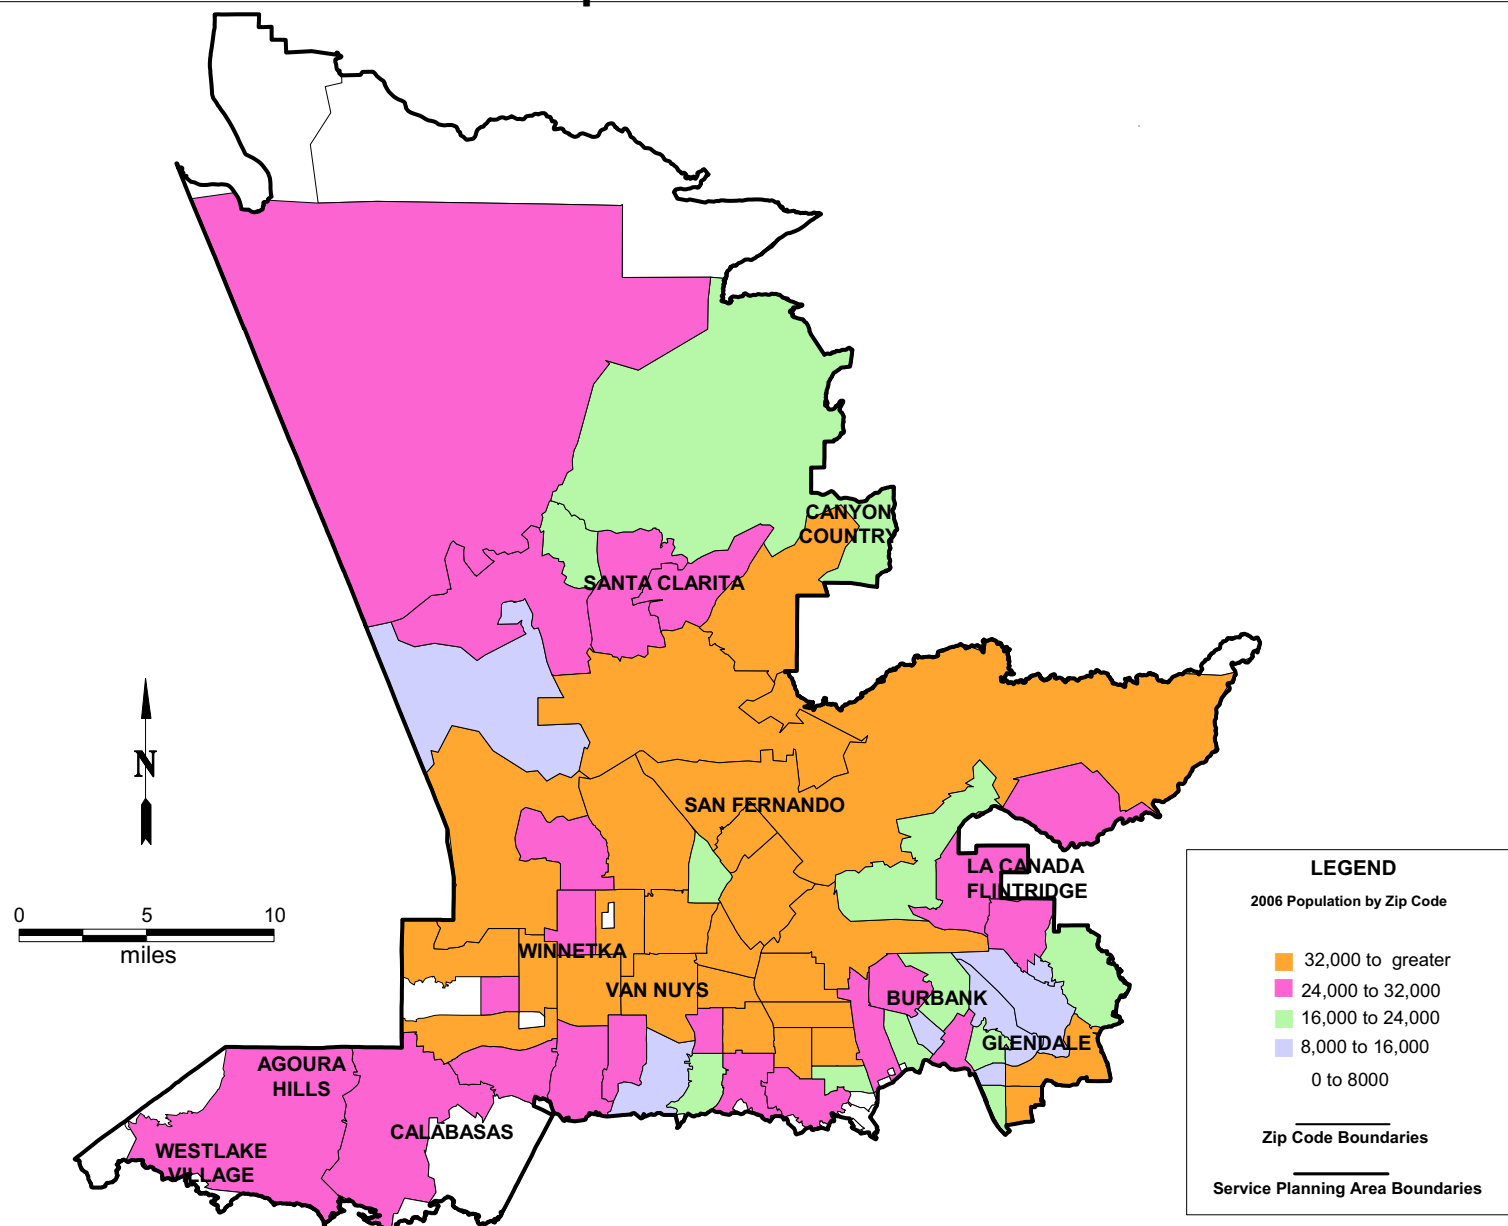

<u>Community</u>	<u>Population</u>	<u>% of Total Valley Population</u>
Glendale	185,393	9.9%
Van Nuys	183,405	9.8%
North Hollywood	166,255	8.9%
Burbank	108,913	5.8%
Pacoima	99,506	5.3%

The largest population centers in the Santa Clarita Valley: (Total Population: 243,000)

<u>Community</u>	<u>Population</u>	<u>% of Total Valley Population</u>
Canyon Country	66,534	27.3%
Valencia	52,201	21.4%
Saugus/Santa Clarita	48,740	20.2%

Los Angeles County Service Planning Area 2

Total Population 2006

Source: Claritas 2006 Estimates

LAC DHS Office of Planning and Analysis
June 7, 2007

Population Growth:

The population of the San Fernando Valley is projected to increase from 1,871,762 people in year 2006 to 1,972,178 people by the year 2011, reflecting an increase of 5.36%. The greatest population growth in the San Fernando Valley over the next five years is projected to be among the population 85+ (19.02% increase) and those 45-64 years (15.51% increase). The largest drop in population of the San Fernando Valley is projected to be for those 35-44 years (1.46%).

Within the Santa Clarita Valley, the population is projected to increase from 243,439 in year 2006 to 274,194 by the year 2011, reflecting an increase of 12.63%. The population segments projected to experience the greatest population growth over this period in the Santa Clarita Valley are those persons 64-84 (37.31% increases) and those 85+ (22.47%). Santa Clarita Valley, like the San Fernando Valley, is projected to see the largest decline in the population 35-44 years (5.93%).

Population by Gender:

The gender distribution of SPA 2 approximates a 50/50 split with females making up 50.4% of the population and males making up 49.6%. The San Fernando Valley is comprised of 50.6% (946,630) females and 49.4% (925,132) males in contrast with the Santa Clarita Valley, which is comprised of 51.3% (124,877) males and 48.7% (118,562) females.

Population by Race and Ethnicity:

The racial and ethnic composition of SPA-2 remains diverse, especially in the San Fernando Valley where many cultures have converged in one area, and no racial group currently represents a majority (44.36% white, 38.59% Latino, 9.77% Asian, and 3.53% African American). Nonetheless, there are communities within the San Fernando Valley where one racial group predominates.

The racial composition of the San Fernando Valley:

Caucasian	41.72%	2+ Races	3.25%
Latino	40.67%	Native American	0.26%
Asia	10.21%	Other	0.21%
African American	3.56%	Asian Pacific Islander	0.11%

The racial composition of the Santa Clarita Valley:

Caucasian	64.62%	2+ Races	2.29%
Latino	22.64%	Native American	0.35%
Asia	6.39%	Other	0.24%
African American	3.31%	Asian Pacific Islander	0.15%

Latinos represent 40.67% (761,161) of the total San Fernando Valley population. Van Nuys with 104,140 Latinos comprises approximately 14% of the total San Fernando Valley Latino population followed by North Hollywood with 13%. Communities in the San Fernando Valley where the Latino population is the majority (>70% of the total population in that community) include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
San Fernando	32,831	89.54%
Pacoima	84,837	85.26%
Sun Valley	36,685	75.30%
Panorama City	53,338	74.72%
Sylmar	60,768	71.13%

Latinos represent 22.64% (55,114) of the total Santa Clarita Valley population. Canyon Country with 17,768 Latinos comprises 32% of the total Santa Clarita Valley Latino population followed by Newhall with 25%.

Communities in the Santa Clarita Valley where the Latino population is over 25% of the total community include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Canyon Country	17,768	26.71%
Newhall	13,658	39.90%
Stevenson Ranch	9,041	31.79%

Caucasians represent 41.72% (780,971) of the total San Fernando Valley population. Communities in the San Fernando Valley where the Caucasian population is the majority (>75%) of the total community include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Calabasas	21,279	85.18%
Agoura Hills	25,070	82.15%
Studio City	22,186	80.09%
Encino	33,121	79.47%
Woodland Hills	48,032	77.25%
Sherman Oaks	39,422	75.85%

Caucasians represent 64.62% (157,310) of the total Santa Clarita Valley population. Communities in the Santa Clarita Valley where the Caucasian population is the majority (>75%) of the total community include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Valencia	39,750	76.15%
Santa Clarita	36,753	75.41%

Asians represent 10.21% (191,185) of the total San Fernando Valley population. Glendale with 30,496 comprises 16% of the total San Fernando Valley Asian population. Communities in the San Fernando Valley with a significant Asian population (>20%) include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Porter Ranch	9,286	30.47%
La Crescenta	7,443	24.38%
La Cañada	5,170	23.80%
Northridge	9,409	21.30%
Montrose	1,765	21.04%

Asians comprise 6.39% (15,563) of the total population in the Santa Clarita Valley. Valencia with 4,210 Asians comprises 27% of the total Asian population in the Santa Clarita Valley. Communities in the Santa Clarita Valley with a significant Asian population (>15%) include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Castaic	2,044	15.37%

African Americans comprise 3.56% (66,650) of the total population of the San Fernando Valley. Van Nuys with 9,972 African Americans comprises 15% of the total San Fernando Valley African American population followed by North Hollywood with 12%. . Communities in the San Fernando Valley with a significant of African American population (>5% of the total population of the community) include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Valley Village	2,066	6.36%
Sylmar	4,898	5.73%
Van Nuys	9,972	5.44%

African Americans comprise 3.31% (8,064) of the total population of the Santa Clarita Valley. Stevenson Ranch with 2,788 African Americans comprises 35% of the total Santa Clarita Valley African American population followed by Canyon Country with 31%. Communities in the Santa Clarita Valley with a significant African American population (>5%) include:

<u>Community</u>	<u>Population</u>	<u>% of Individual Community</u>
Stevenson Ranch	2,788	9.80%
Castaic	2,114	20.70%

Population Language Spoken at Home

Population ≥ 5 years of age

SPA 2 is a very diverse area as immigrants from other countries have relocated here. Comparing the San Fernando Valley to the Santa Clarita Valley shows there is a larger portion of non-English speaking residents. There are 1,761,758 residents over five years of age in the San Fernando Valley. Approximately 46%(805,896) of San Fernando Valley residents speak only English at home compared to 75.76% (166,363) of the 219,600 over five years of age residents in the Santa Clarita Valley.

San Fernando Valley Communities with a large concentration of Spanish speaking residents:

<u>Community</u>	<u>Population</u>	<u>% of Community Population (≥5)</u>
Sun Valley	28,542	64.70%
Panorama City	41,211	64.00%
North Hollywood	73,073	53.00%
North Hills	27,045	47.30%
Van Nuys	78,458	47.10%
Mission Hills	7,444	45.70%

Santa Clarita Valley communities with a large concentration of Spanish speaking residents:

<u>Community</u>	<u>Population</u>	<u>% of Community Population (≥5)</u>
Newhall	9,840	31.10%
Castaic	7,058	27.60%

Population by Age:

Population (ages 0-17):

Comparing the Santa Clarita Valley to the San Fernando Valley shows that the age composition of the Santa Clarita Valley is younger compared to the San Fernando Valley. Children (ages 0-17) comprise 28.72% (69,916) of the Santa Clarita Valley population while in the San Fernando Valley this age group represents only 25.55% (478,319) of the total population. Overall, children (ages 0-17) make up 25.92% of SPA 2 population.

San Fernando Valley communities where children comprise over 32% of the total population include Panorama City (33.22%), the City of San Fernando (33.05%), and Pacoima (32.61%). Communities with the fewest children consist of Studio City (15.29%), Sherman Oaks (16.91), and Encino (18.61%). The San Fernando Valley had the largest number of births in LA County in 2005. Santa Clarita communities where children comprise over 30% of the total population include Castaic (31.16%) and Santa Clarita (30.75%).

San Fernando Valley communities with a large number of children:

<u>Community</u>	<u>Population</u>	<u>% of SFV Population (ages 0-17)</u>
Van Nuys	51,665	10.80%
North Hollywood	45,304	9.47%
Glendale	38,997	8.15%
Pacoima	32,446	6.78%
Sylmar	26,543	5.55%

Santa Clarita Valley communities with a large number of children:

<u>Community</u>	<u>Population</u>	<u>% of SCV Population (ages 0-17)</u>
Canyon Country	19,955	28.54%
Valencia	15,010	21.47%

Population (ages 18-34):

Young adults (ages 18-34) account for 23.30% (436,034) of the total population in the San Fernando Valley. In the Santa Clarita Valley, young adults (18-34) account for 21.90% of the total population. In SPA 2, overall 23.13% (53,304) of the population represent 18 to 34 year olds.

San Fernando Valley communities where young adults (ages 18-34) account for over 26% of their community population include Panorama City (27.73%), Pacoima (27.36%), San Fernando (26.80%), and North Hollywood (26.70%). Communities with the fewest young adults (ages 18-34) include La Canada (15.51%), Calabasas (15.83%), and West Hills (15.97%).

Santa Clarita Valley communities where young adults (18-34) consist of over 26% of their community population include Stevenson Ranch (29.37%) and Newhall (26.29%). Communities with the fewest young adults include Valencia (17.72%) and Stevenson Ranch (18.18%).

San Fernando Valley communities with a large number of young adults:

<u>Community</u>	<u>Population</u>	<u>% of SFV Population (ages 18-34)</u>
Van Nuys	47,593	10.91%
North Hollywood	44,389	10.18%
Glendale	40,370	9.26%

Santa Clarita Valley communities with a large number of young adults:

<u>Community</u>	<u>Population</u>	<u>% of SCV Population (ages 18-34)</u>
Canyon Country	15,175	28.46%
Valencia	9,249	17.35%

Population (ages 65-84):

Seniors (ages 65-84) account for 9.45% (176,943) of the total population in the San Fernando Valley. In the Santa Clarita Valley, seniors (ages 65-84) account for 6.12% (14,904) of the total population.

San Fernando Valley communities where seniors (ages 65-84) account for over 13% of their total community population include Encino (17.28%), Woodland Hills (14.64%), West Hills (13.62%), and Tarzana (13.28%).

Santa Clarita Valley communities where seniors (ages 65-84) account for over 7% of their total community population include Newhall (9.38%) and Valencia (7.02%).

San Fernando Valley communities with a large concentration of seniors include:

<u>Community</u>	<u>Population</u>	<u>% of SFV Population (ages 65-84)</u>
Glendale	22,688	12.82%
Van Nuys	12,691	7.17%
Burbank	11,841	6.69%
North Hollywood	11,563	6.53%

Santa Clarita Valley communities with a large concentration of seniors include:

<u>Community</u>	<u>Population</u>	<u>% of SCV Population (ages 65-84)</u>
Canyon Country	3,824	27.13%
Valencia	3,663	24.58%
Newhall	3,210	21.54%

As SPA 2 baby boomers continue to age, the role of long-term care and home health services will become important resources for both valleys. According to the 2006-2007 San Fernando Valley Economic Report, long-term care facilities are showing profits and an increase in occupancy. Two-thirds of long-term care patients are female. “Most long-term care patients have relatively short stays...Skilled Nursing services account for 90% of patient days.”

Population (ages 85+)

Seniors over 85 years old account for 1.54% (28,743) of the total population in the San Fernando Valley. In the Santa Clarita Valley, seniors over 85 years account for .80% (1,945) of the total population.

San Fernando Valley communities where seniors (ages 85+) consist of over 2% of their community total population include Montrose (2.89%), Studio City (2.78%), and Glendale (2.69%).

San Fernando Valley communities with a large concentration of seniors include:

<u>Community</u>	<u>Population</u>	<u>% of SFV Population (ages 85+)</u>
Glendale	3,966	13.80%
Burbank	2,281	7.94%
Van Nuys	2,267	7.89%

Santa Clarita Valley communities with a large concentration of seniors include:

<u>Community</u>	<u>Population</u>	<u>% of SCV Population (ages 85+)</u>
Valencia	644	33.11%
Newhall	541	27.81%

Santa Clarita Valley communities where seniors (ages 85+) consist of over 1% of their community population include Newhall (1.58%) and Valencia (1.23%).

Population Family Characteristics:

San Fernando Valley has 229,690 households with children. Of those households 74.45% (171,006) are married households with children, 18.68% (42,914) are single female head households, and 6.87% (15,770) are single male head households.

San Fernando Valley communities with a large concentration of single female head of household with children:

<u>Community</u>	<u>Population</u>	<u>% of SFV Single Female Household with Children</u>
Van Nuys	5,495	12.80%
North Hollywood	4,494	10.47%
Glendale	3,429	7.99%

Santa Clarita Valley communities with a large concentration of single female head of household with children:

<u>Community</u>	<u>Population</u>	<u>% of SCV Single Female Household with Children</u>
Canyon Country	1,768	41.16%
Valencia	903	19.65%

Population Household Income Levels:

Household income levels illustrate the disparities that exist in SPA 2. In 2005, there were 647,423 households in the San Fernando Valley. There are 12.44% (80,536 households) reporting annual incomes below \$15,000.00. In the Santa Clarita Valley 4,418 households (5.77%) report annual incomes below \$15,000.00. In addition, the percentage of households in the San Fernando Valley earning less than \$35,000.00 is 21.68%. In comparison, Santa Clarita has 11.62% of their population with household incomes of less than \$35,000.00

At the opposite end of the spectrum, the Santa Clarita Valley has 13.90% (10,639 households) earning above \$150,000.00, while the San Fernando Valley only has 9.33% (59,454 households) earning above \$150,000.00.

In comparison to the 2004 Triennial Community Needs Assessment, the percentage of households earning below \$25,000.00 has risen from 17.45% to 23.18% in the San Fernando Valley and from 8.72% to 10.76% in the Santa Clarita Valley.

Three communities in the San Fernando Valley make up approximately 40% of households with annual incomes below \$15,000.00 per year: Glendale 14.46%, Van Nuys 13.26%, and North Hollywood 12.17%.

Two communities in Santa Clarita Valley make up approximately 57% of households in the Santa Clarita Valley, with annual incomes below \$15,000.000 per year: Newhall 30.26% and Canyon Country 26.96%.

San Fernando Valley communities where over 17% of the community has a household income under \$15,000.00 per year include:

<u>Community</u>	<u>Households</u>	<u>% of Individual Community</u>
Panorama City	1,309	17.77%
Van Nuys	10,681	17.34%
North Hollywood	9,804	17.30%
Glendale	11,649	7.25%

Santa Clarita communities where over 10% of the communities have a household income under \$15,000.00 per year include:

<u>Community</u>	<u>Households</u>	<u>% of Individual Community</u>
Newhall	1,337	11.87%

Additionally there are seven cities in the San Fernando Valley where over 25% of the households have an income level between \$15,000.00 and \$34,999.00.

San Fernando Valley communities where over 25% has a household income between \$15,000.00 and \$35,000.00 per year include:

<u>Community</u>	<u>Households</u>	<u>% of Individual Community</u>
Panorama City	5,993	32.19%
Van Nuys	18,687	30.34%
North Hollywood	16,809	29.67%
Pacoima	5,994	27.02%
Sun Valley	3,154	26.21%
San Fernando	2,215	25.59%
Reseda	5,861	25.42%

Over one-third (34.12%) of the San Fernando Valley residents have a household income level of less than \$35,000.00. In comparison, 17.39% of Santa Clarita Valley residents have household incomes levels less than \$35,000.00.

Santa Clarita Valley communities where over 12% has a household income level between \$15,000.00 and \$35,000.00 per year include:

<u>Community</u>	<u>Households</u>	<u>% of Individual Community</u>
Newhall	2,191	19.44%
Canyon Country	2,862	13.03%

Only 13.90% of the population in Santa Clarita Valley has a household income level over \$150,000.00. In comparison, 9.50% of San Fernando residents have household income levels over \$150,000.00.

Three communities in the San Fernando Valley make up approximately 23% of households with annual incomes over \$150,000.000; Glendale 8.36%, Woodland Hills 7.86%, and Sherman Oaks 6.27%.

Two communities in the Santa Clarita Valley make up approximately 55% of households with annual incomes over \$150,000.00: Valencia 32.85%, and Saugus (Santa Clarita) 21.78%.

San Fernando communities where over 30% of the community household income is over \$150,000.00 include:

<u>Community</u>	<u>Households</u>	<u>% of Individual Community</u>
La Canada	2,838	39.29%
Calabasas	3,295	39.11%
Topanga	727	31.16%

Santa Clarita communities where over 18% of the community household income is over \$150,000 include:

<u>Community</u>	<u>Households</u>	<u>% of Individual Community</u>
Stevenson Ranch	944	24.82%
Valencia	3,495	18.79%

In 2005, bankruptcies rose overall, according to the 2006-2007 San Fernando Valley Economic Report. “Last year’s rise in the Valley’s share is worth monitoring, particularly to determine the cause for the upward drift in the Valley’s share of Chapter 13 filings, but perspective is gained by noting that the Valley’s share only rose from 13.7 percent to the District to 14.3 percent.”

Charts and graphs provided at the end of this section show comparisons of household income levels over time.

Population Housing Characteristics:

SPA 2 contains 723,975 occupied housing units. There is a distinct difference in homeownership between the San Fernando Valley and the Santa Clarita Valley. The San Fernando Valley consists of 647,423 occupied housing units, of which 328,878 (50.80%) are owned and 318,545 (49.20%) are rented. Contrasting those numbers of the 76,552 occupied housing units in the Santa Clarita Valley, 57,322 (74.88%) are owned and 19,230 (25.12%) are rented. In addition to the 723,775 occupied housing units in SPA 2, there are 23,626 vacant housing units.

San Fernando Valley communities with the lowest percentage of people owning homes:

<u>Community</u>	<u>Total Housing Units</u>	<u>% of Home Owners in the Community</u>
Valley Village	15,221	30.52%
North Hollywood	56,656	31.92%
Van Nuys	61,606	34.17%
Glendale	67,547	35.23%

Santa Clarita Valley communities with the lowest number of home ownership:

<u>Community</u>	<u>Total Housing Units</u>	<u>% of Home Ownership in the Community</u>
Newhall	11,268	60.73%
Canyon Country	21,959	67.85%

The California State University, Northridge Economic Forecast 2005 Report states \$620,265 as the median selling price of a home in the San Fernando Valley, reflecting a 13.9% change.

The median number of rooms in the housing stock located in SPA 2 is 4.6. Approximately 49% of householders moved into their units in 2000 or later. Seventy-eight percent of the San Fernando Valley housing stock was built prior to 1980, according to data based on the U.S. Census Bureau, 2005 American Community Survey.

Population by Levels of Education:

The following shows the various levels of education for communities within SPA 2. Within the San Fernando Valley, approximately 26% (321,212) of the people aged 25+ have not graduated from high school. In the Santa Clarita Valley, 12.8% (18,751) of people aged 25+ have not graduated from high school.

LAUSD District 1 and District 2 cover the San Fernando Valley. For class year 2005-2006, the graduation rate in District 1 was 78.2% with a four year derived dropout rate of 14.16%. In the same timeframe, District 2 had a 70.6% graduation rate and a 17.3% four year derived dropout rate (<http://search.lausd.k12.ca.us/cgi-bin/fccgi.exe>). Both districts include areas with lower than average household income levels; however, District 2 has a greater portion of lower socio-economic areas based on household income levels.

Three communities in the San Fernando Valley make up 35% of those over 25 years old with less than a high school education. Those communities are Van Nuys 12.67%, North Hollywood 12.01%, and Pacoima 10.55%.

Five San Fernando Valley communities with greater than 40% of individuals (age 25+) have less than a high school education:

<u>Community</u>	<u>Population <HS</u>	<u>% of Individual Community</u>
Pacoima	33,888	60.92%
City of San Fernando	12,089	59.32%
Sun Valley	14,051	50.19%
Panorama City	19,576	48.93%
North Hollywood	38,584	41.51%

Two communities in the Santa Clarita Valley make up approximately 54% of those over 25 years old with less than a high school education: Canyon Country 28.20% and Newhall 26.19%.

Two Santa Clarita Valley communities where greater than 20% of individuals (25+) have less than a high school education:

<u>Community</u>	<u>Population <HS</u>	<u>% of Individual Community</u>
Newhall	4,910	23.10%
Castaic	3,642	21.30%

San Fernando Valley communities according to the greatest number of individuals (ages 25+) with a graduate degree:

<u>Community</u>	<u>Population</u>	<u>% of SFV Population with a Graduate Degree</u>
Glendale	14,333	11.92%
Woodland Hills	7,938	6.60%
Sherman Oaks	7,739	6.44%
Van Nuys	7,417	6.17%
Burbank	6,479	5.39%

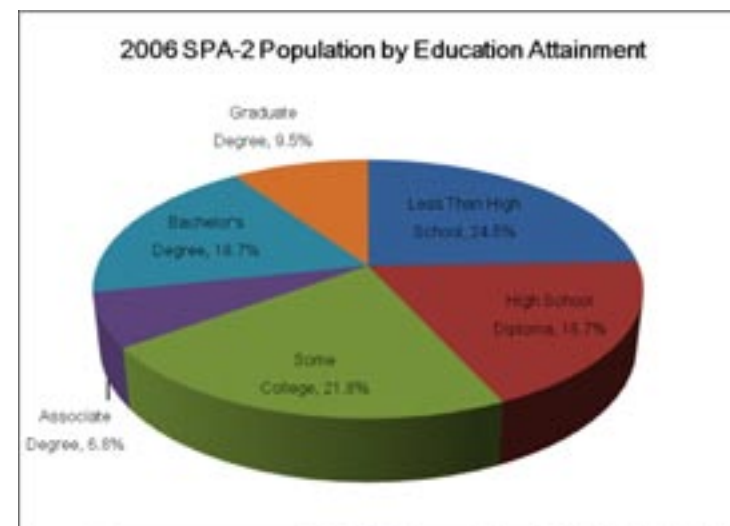

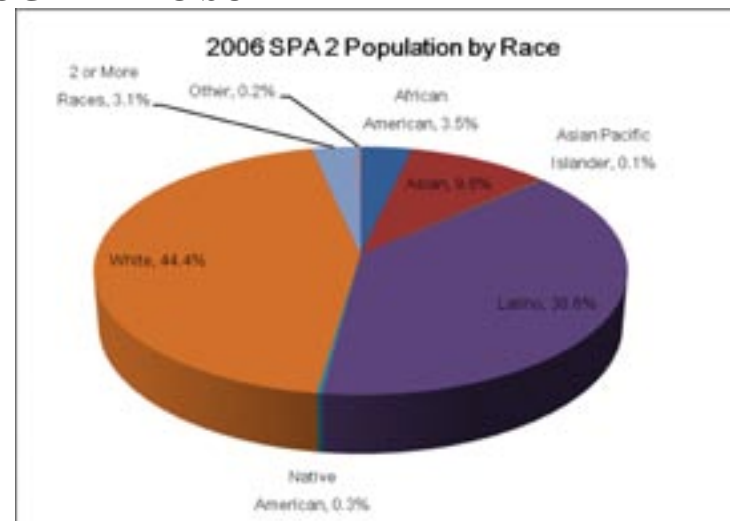

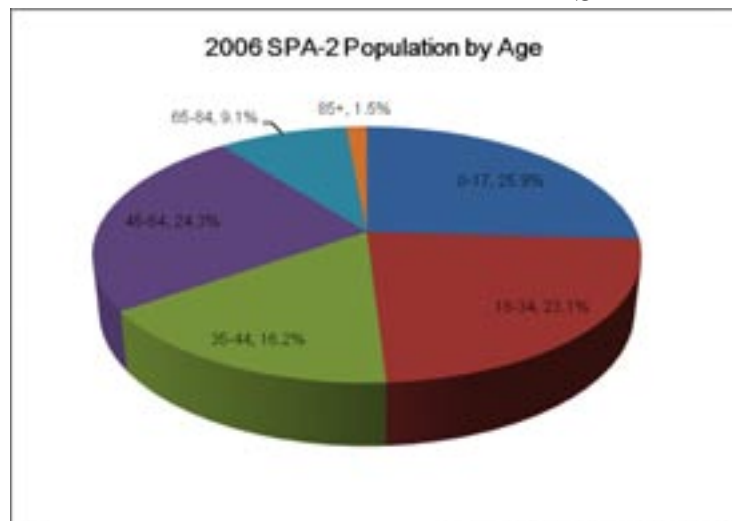

San Fernando Valley communities where over 24% of the community residents over age 25 possess a graduate degree are La Canada 4,033 (29.2%), Topanga 1,140 (27.0%) and Calabasas 3, 996 (24.9%).

Santa Clarita Valley communities with the greatest number of individuals (ages 25+) with a graduate degree:

<u>Community</u>	<u>Population</u>	<u>% of SCV Population with a Graduate Degree</u>
Valencia	4,419	35.57%
Canyon Country	2,626	21.10%

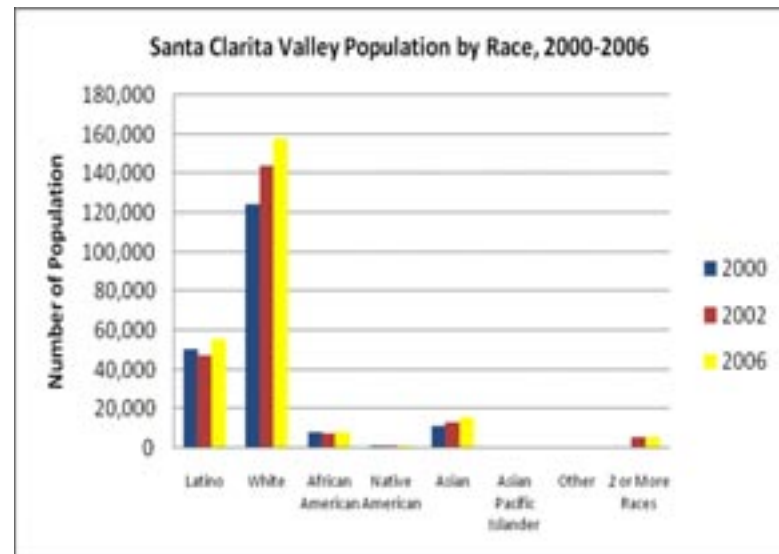

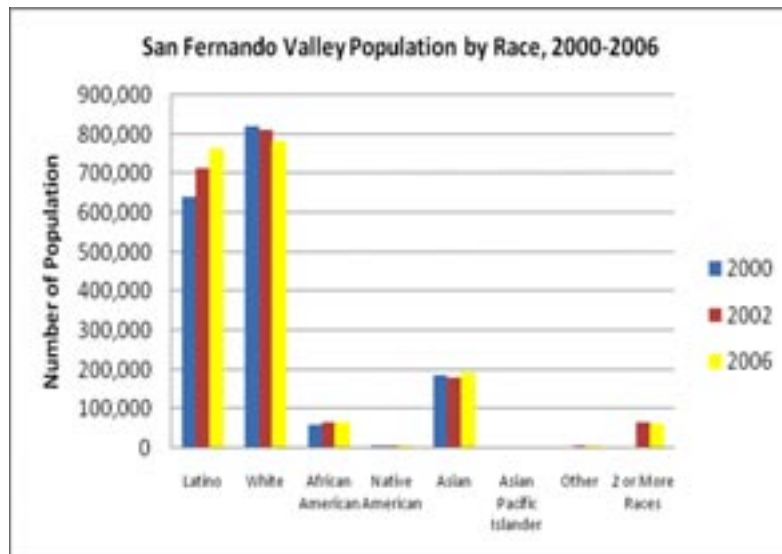

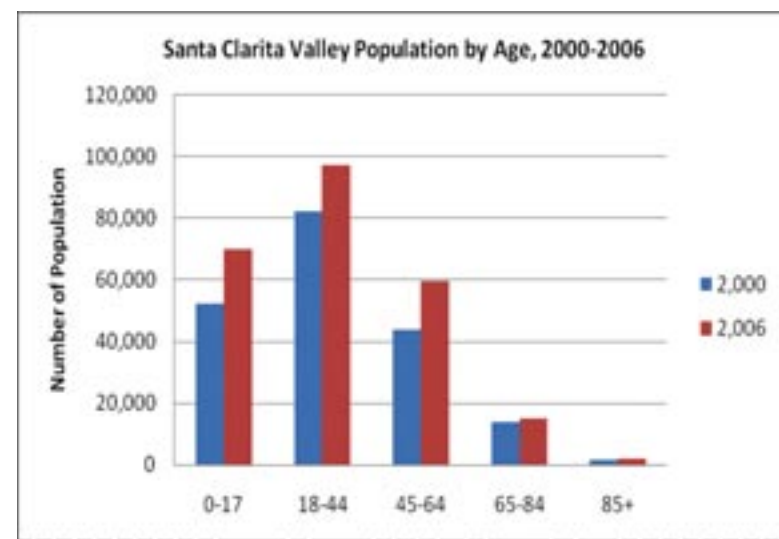

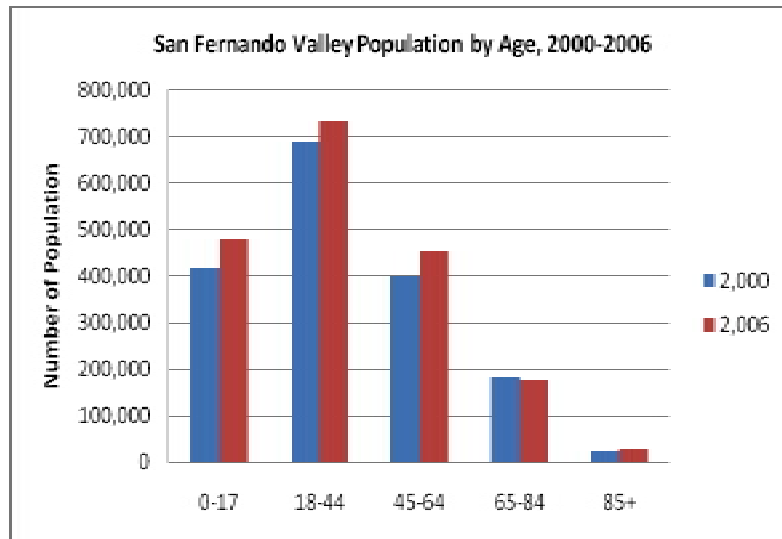

Santa Clarita Valley communities with 12% or more of the community residents over age 25 possess a graduate degree include Stevenson Ranch 989 (14.3%) and Valencia 4,419 (13.5%).

SPA 2 DEMOGRAPHIC SUMMARY

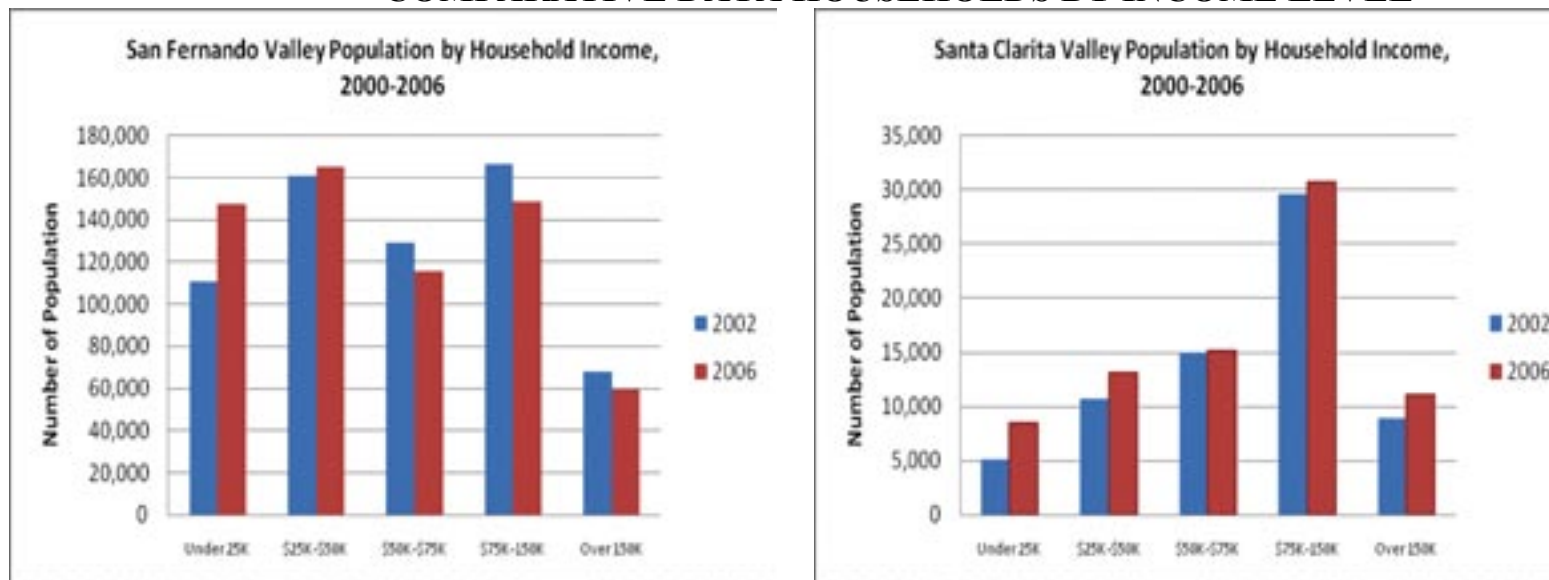

The pie charts above display the population characteristics discussed on the previous pages. For information by specific zip codes, please refer to the secondary data tables provided in Appendix D.

COMPARATIVE DATA POPULATION BY AGE AND RACE

COMPARATIVE DATA HOUSEHOLDS BY INCOME LEVEL

The previous graphs are provided to represent the changes within SPA 2.

The San Fernando Valley is experiencing a rise in household income level under \$50,000.00 and a decrease in levels above \$50,000.00. Meanwhile, Santa Clarita Valley is experiencing a rise in all household income levels.

HEALTH STATUS

SPA 2 Birth Profiles:

In 2005, there were 28,633 total births in SPA 2. The San Fernando Valley accounted for 25,024 births, and the Santa Clarita Valley accounted for 3,609 births. The majority of births in both Valleys were to mothers between the ages of 20-29. The percentage of births to mothers less than 20 years old was 7.44% (1,863) in the San Fernando Valley compared to 3.63% (131) in the Santa Clarita Valley. In the San Fernando Valley, 57.32% (14,343) of new births were to Hispanic mothers. This differs from the Santa Clarita Valley where the greatest number of new births was to Caucasian mothers: 49.65% (1,795).

Greatest Number of Births:

San Fernando Valley communities with the greatest number of births in 2005:

<u>Community</u>	<u>Births</u>	<u>% of Total SFV Births</u>
North Hollywood	3,411	13.63%
Van Nuys	2,844	11.37%
Pacoima	2,013	8.40%
Glendale	1,915	7.65%
Sylmar	1,530	6.11%

Santa Clarita Valley communities with the greatest number of births in 2005:

<u>Community</u>	<u>Births</u>	<u>% of Total SCV Births</u>
Canyon Country	1,056	29.26%
Valencia	833	23.08%

Mothers with Early Prenatal Care:

A large majority, 23,223 (92.80%) of San Fernando Valley mothers received prenatal care in the first trimester. This is comparable to the 3,384 (93.77%) of Santa Clarita Valley mothers who received prenatal care in the first trimester.

San Fernando Valley communities with the highest percentage of births with prenatal care in the first trimester of pregnancy:

<u>Community</u>	<u>1st Trimester Care Births</u>	<u>% of Total Community Births</u>
Studio City	290	98.6%
Calabasas	198	97.5%
Sherman Oaks	656	97.5%
Montrose	68	97.1%

Santa Clarita Valley communities with the highest percentage of births with prenatal care in the first trimester of pregnancy:

<u>Community</u>	<u>1st Trimester Care Births</u>	<u>% of Total Community Births</u>
Valencia	799	95.9%
Stevenson Ranch	239	95.6%

Mothers without Early Prenatal Care:

The following communities in SPA 2 need improvements in early prenatal care for pregnant mothers in their first trimester.

San Fernando Valley communities with the highest percentage of births without first trimester prenatal care:

<u>Community</u>	<u>Births w/o 1st Trimester Care</u>	<u>% of Total Community Births</u>
Sylmar	179	11.70%
Pacoima	222	11.03%
San Fernando	68	10.46%
Mission Hills	27	10.23%

SPA 2 Death Profiles:

Leading Causes of Death for 2004:

The leading causes of death are the same for both Valleys. While the top three remain in the same rank order as they did in the 2002 report, both Valleys saw a change in the order of the fourth and fifth leading causes of death. In the Santa Clarita Valley, 8% of deaths were due to stroke/cerebrovascular disease, surpassing deaths due to injuries. This is an increase of 3% from the 2002 report indicating that 5% of deaths were due to stroke/cerebrovascular disease.

Females accounted for 51% (6334) of SPA 2 deaths with males at 49% (6102).

In 2004, there were 12,436 deaths in SPA 2. The San Fernando Valley accounted for 11,498 of the total deaths and the Santa Clarita Valley accounted for 938 of the total deaths.

The leading causes of death (all ages) in the San Fernando Valley based on number of cases include:

<u><i>Causes of Death</i></u>	<u><i>Cases</i></u>	<u><i>% of SFV Deaths</i></u>
Heart Disease	3,738	33%
Cancer	2,636	23%
Stroke/Cerebrovascular Accident	837	7%
Chronic Respiratory Disease	501	4%
Influenza and Pneumonia	471	4%

The leading causes of death (all ages) in the Santa Clarita Valley based on number of cases include:

<u><i>Causes of Death</i></u>	<u><i>Cases</i></u>	<u><i>% of SCV Deaths</i></u>
Heart Disease	268	29%
Cancer	230	25%
Stroke/Cerebrovascular Accident	50	8%
Unintentional Injuries	58	7%
Chronic Respiratory Disease	36	4%

Greatest Number of Deaths by Area:

San Fernando Valley communities with the highest number of deaths:

<u>Community</u>	<u>Deaths</u>	<u>% of Total SFV Deaths</u>
Glendale	1,291	11%
Van Nuys	907	8%
North Hollywood	841	7%
Burbank	761	6%

In the Santa Clarita Valley, the communities with the greatest number of deaths include:

<u>Community</u>	<u>Deaths</u>	<u>% of Total SCV Deaths</u>
Newhall	233	25%
Canyon Country	217	23%

SPA 2 Mental Health Profiles:

Information received from Los Angeles County Department of Mental Health by diagnosis for all ages and diagnosis for SPA 2 is provided under Appendix D.

Admission diagnosis has been separated by the following age groups: children (ages 0-15), transitional youth (ages 16-25), adults (ages 26-59), and older adults (ages 60+).

In Los Angeles County, 23,540 children (ages 0-15) were admitted for mental health services, 13.60% (3,200) of those admissions were from SPA 2. Note that this number represents only those client cases in which a diagnosis code was present and is not a total client count. In some cases, diagnosis codes were missing and therefore not counted.

SPA 2 Top Five-Admission Diagnoses for Children (ages 0-15) During Fiscal Year 2005-06:

<u>Diagnosis</u>	<u>Cases</u>	<u>% of Total SPA 2 Admissions</u>
Attention-Deficit/Hyperactivity Disorder, Hyperactive Impulse Type	1,004	31.38%
Oppositional Defiant Disorder	710	22.19%
Attention-Deficit/Hyperactivity Disorder Predominantly Inattentive Type	188	5.88%
Attention-Deficit/Hyperactivity Disorder NOS	147	4.60%
Generalized Anxiety Disorder	115	3.60%

In Los Angeles County 16,389, transitional youth (ages 16-25) were admitted for mental health services, 18.10% (2,966) were from SPA 2. Please note this number represents only those client cases where a diagnosis code was present and is not a total client count. In some cases, diagnosis codes were missing and therefore not counted.

SPA 2 Top Five-Admission Diagnoses for Transitional Youth (ages 16-25) During Fiscal Year 2005-06:

<u>Diagnosis</u>	<u>Cases</u>	<u>% of Total SPA 2 Admissions</u>
Oppositional Defiant Disorder	300	10.12%
Attention-Deficit/Hyperactivity Disorder, Hyperactive Impulse Type	273	9.21%
Major Depressive Disorder, Recurrent Unspecified	200	6.75%
Cannabis Abuse	199	6.71%
Schizophrenia, Paranoid Type	148	4.99%

In Los Angeles County, 41,744 adults (ages 26-59) were admitted for mental health services, of which 14.74% (6,152) were from SPA 2. Note this number represents only those client cases in which a diagnosis code was present and is not a total client count. In some cases, diagnosis codes were missing and therefore not counted.

SPA 2 Top Five-Admission Diagnosis for Adults (ages 26-59) During Fiscal Year 2005.06:

<u>Diagnosis</u>	<u>Cases</u>	<u>% of Total SPA 2 Admissions</u>
Schizophrenia, Paranoid Type	914	14.86%
Major Depressive Disorder, Recurrent, Moderate	867	14.10%
Major Depressive Disorder, Recurrent, Severe W/O Psychotic Features	680	11.06%
Major Depressive Disorder, Recurrent, Severe with Psychotic Features	630	10.24%
Major Depressive Disorder, Recurrent, Unspecified	369	6.00%

In Los Angeles County, 4,053 older adults (ages 60+) were admitted for mental health services, of which 19.22% (779) were from SPA 2. Note this number represents only those client cases where a diagnosis code was present and is not a total client count. In some cases, diagnosis codes were missing and therefore not counted.

SPA 2 Top Five Admission Diagnosis For Older Adults ages 60+ During Fiscal Year 2005-06:

<u>Diagnosis</u>	<u>Cases</u>	<u>% of Total SPA 2 Admissions</u>
Major Depressive Disorder, Recurrent, Moderate	135	17.33%
Major Depressive Disorder, Recurrent, Severe with Psychotic Features	107	13.74%
Major Depressive Disorder, Recurrent, Severe W/O Psychotic Features	104	13.35%
Schizophrenia, Paranoid Type	88	11.30%
Major Depressive Disorder, Recurrent, Unspecified	52	6.68%

There were 30,435 SPA 2 clients served by the Los Angeles County Department of Mental Health during fiscal year 2005-06. Eighty-five percent of all cases were from three ethnic groups. Please note this number represents only those client cases where a diagnosis code was present and is not a total client count. In some cases, diagnosis codes were missing and therefore not counted.

SPA 2 Clients Served by DMH by Ethnicity:

<u><i>Ethnicity</i></u>	<u><i>Cases</i></u>	<u><i>% of Total SPA 2 Cases</i></u>
Hispanic	13,350	40.86%
White	9,702	29.69%
African American	4,712	14.42%

The majority 70.94% (23,177) clients seen by DMH spoke English followed by 20.62% (6,737) Spanish speakers.

In addition, when comparing the data to the Los Angeles County numbers, the data may reflect some duplicate visits. In other words, if during the same time-frame a client went to a clinic in SPA 2 as well as in SPA 1, both instances are counted in the data.

SPA 2 Heart Disease Prevalence:

Heart Disease is the number one leading cause of death in SPA 2 and accounted for 32% (4,006) of deaths in 2004. SPA 2 prevalence of heart disease in 2005 (all heart disease cases) is shown at 615,466 cases. Hypertension (403,151 cases) accounts for 66% of all heart disease, followed by ischemic heart disease (16%), arrhythmias (13%), and congestive heart failure at 6%. San Fernando residents had 29.77% heart disease prevalence compared to Santa Clarita with 25.29% prevalence.

San Fernando Valley communities with the highest prevalence of heart disease:

<u>Community</u>	<u>Cases</u>	<u>% of SFV All Heart Disease Prevalence</u>
Glendale	63,982	11.52%
North Hollywood	42,660	7.68%
Burbank	35,469	6.40%
Pacoima	23,244	4.19%

Communities in the San Fernando Valley with a higher rate of heart disease include Encino with 41.42% of its 41,570 residents affected, Woodland Hills with 38.09% of its 61,685 residents affected, as well as La Cañada, Studio City, and Tarzana all with 36-37% of their community populations affected.

In the Santa Clarita Valley the communities with the highest prevalence of heart disease:

<u>Community</u>	<u>Cases</u>	<u>% of SCV All Heart Disease Prevalence</u>
Newhall	19,703	32.80%
Canyon Country	14,056	23.40%

Communities in the Santa Clarita Valley possessing a higher rate of heart disease include Stevenson Ranch with 54.38% of its 10,951 residents and Santa Clarita with 41.20% of its 47,818 residents.

SPA 2 Cancer Prevalence:

Cancer is the second leading cause of death in SPA 2 and accounted for 23% (2,866) deaths in 2004. SPA 2 cancer prevalence in 2005 (all cancer cases) is shown at 302,659 cases. Breast Cancer (60,165 cases) accounts for 20% of all cancers. Prostrate cancer also accounts for 11% (34,635 cases) of all cancers.

San Fernando Valley communities with the highest prevalence of cancer:

<u>Community</u>	<u>Cases</u>	<u>% of SFV All Cancer Cases</u>
Van Nuys	23,938	9%
Glendale	23,371	8%
Pacoima	22,983	8%
North Hollywood	21,189	7%

Communities in the San Fernando Valley with a high prevalence of cancer include Reseda (24.18%), Sylmar, and Pacoima each at (22.81%) and Granada Hills at (22.15%) of their community residents. Montrose is the community with the lowest cancer prevalence rate with 5.7% of its 8,233 residents affected.

In the Santa Clarita Valley the communities with the highest prevalence of Cancer:

<u>Community</u>	<u>Cases</u>	<u>% of SCV All Cancer Cases</u>
Newhall	19,703	33%
Canyon Country	14,056	23%

Communities in the Santa Clarita Valley reporting higher cancer prevalence are Stevenson Ranch with 18.04% of its 10,951 residents affected and Newhall with 10.7% of its 39,194 residents affected.

SPA 2 Diabetes & Obesity Trends:

This section will review the trends as reported in the Key Indicators of Health. "Los Angeles County Department of Public Health, Office of Health Assessment and Epidemiology, Health Assessment Unity, 2005 Los Angeles County Health Survey.

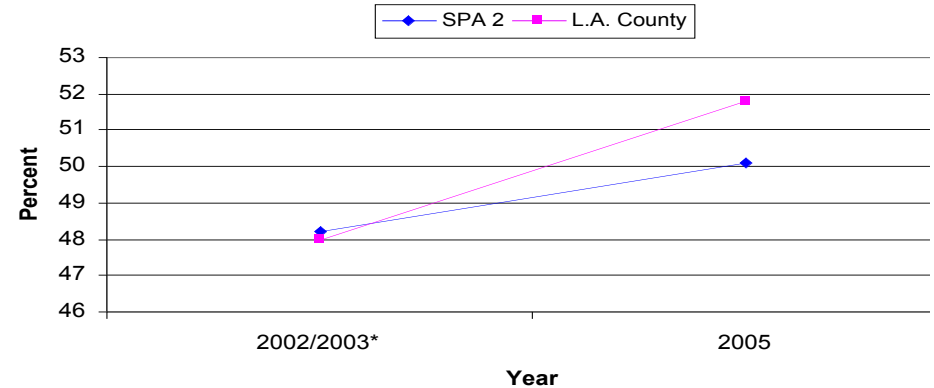

Diabetes and Obesity Preventive Indicators and Outcomes

Indicators	SPA 2				L.A. County			
	1997	1999/2000	2002/2003*	2005	1997	1999/2000	2002/2003*	2005
Percent of adults who consume five or more servings of fruits and vegetables a day	-	13.1	13.2	13.0	-	11.6	12.3	14.6
Percent of adults who obtain recommended amount of exercise each week	-	-	48.2	50.1	-	-	48.0	51.8
Percent of adults who are sedentary (minimally active or inactive)	-	-	41.5	39.2	-	-	41.8	37.5
Percent of adults who are overweight (25 ≤ BMI < 30)	34.1	34.6	37.0	34.2	34.4	35.6	35.4	35.5
Percent of adults who are obese (BMI ≥ 30)	11.4	13.9	15.9	17.0	14.3	16.7	19.3	20.9
Percent of adults diagnosed with Diabetes	4.9	5.7	6.1	6.1	5.7	6.7	7.0	8.1

* 2002-2003 Los Angeles County Health Survey estimates may differ from prior estimates as new weights were utilized beginning March 20, 2006.

Percent of Youth² Who Are Overweight³

	Years					
	1999	2001	2002	2003	2004	2005
L.A. County⁴	18.9	20.4	20.9	21.9	22.2	23.3
SPA 2	16.8	18.3	17.7	19.1	20.1	20.8
San ernando ⁵	14.9	16.6	16.9	18.1	17.5	18.5
East Valley ⁵	22.5	25.1	24.4	25.8	26.4	28.8
West Valley ⁵	15.6	17.8	17.6	18.6	20.7	21.0
Glendale ⁵	7.3*	14.6	12.0	15.1	16.0	16.2

Source: California Department of Education Physical Fitness Testing Program

¹ Includes students from grades 5, 7, and 9 enrolled in a California public school at which the body mass index (BMI) measurement for body composition was administered (as opposed to skin caliper or bioelectrical impedance measurements).

² Overweight is defined as being in the 95th BMI percentile or greater, applying the 2000 CDC Growth Chart percentile curves.

³ Includes students from schools physically located within the county of Los Angeles.

⁴ Health Districts for 1999 are defined according to the 1990 Health District Boundaries.

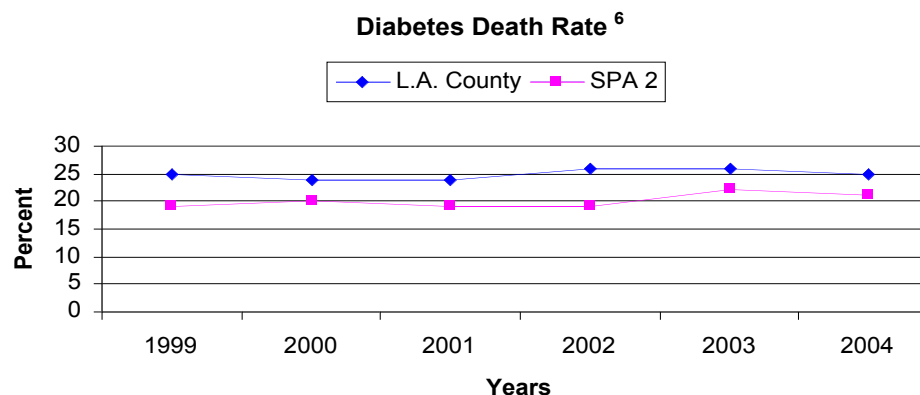

^a Estimate may be unstable and should be interpreted cautiously due to the small number of students with BMI-related information in this strata (n<1000).

Percent of Youth² Who Are Overweight³

Diabetes Death Rate⁶

	Years					
	1999	2000	2001	2002	2003	2004
L.A. County	25	24	24	26	26	25
SPA 2	19	20	19	19	22	21

Source: Los Angeles County Mortality Report 2004, Los Angeles County Dept. of Public Health, Office of Health Assessment and Epidemiology.

⁵ Age-adjusted rate per 100,000. Population estimates were revised, therefore, death rates for 2001 and 2002 may differ from those in Mortality in Los Angeles County, 2002.

In 2004, diabetes mellitus was the seventh leading cause of death in SPA 2, accounting for 3% (2,395) of deaths. This remains the same as in 2002, when there were 333 deaths due to diabetes mellitus accounting for 3% of 2002 SPA 2 deaths.

San Fernando Valley communities with greater than 20 deaths from diabetes mellitus include Glendale 50 (14% of SFV Diabetes deaths), Van Nuys 36 (10% of SFV Diabetes deaths), North Hollywood 24 (7% of SFV Diabetes deaths), and Pacoima 21 (6% of SFV Diabetes deaths). San Fernando Valley had 367 deaths due to diabetes.

Santa Clarita Valley had 28 deaths from diabetes with Newhall having eight deaths for 29% of the total SCV death rate for diabetes mellitus.

SPA 2 Asthma Trend Data:

Asthma Preventive Indicator and Outcomes

Indicators	SPA 2		L.A. County	
	2002/2003	2005	2002/2003	2005
Percent of children ages 0-17 years with Asthma ^{1,7}	8.7	7.9	8.1	8.8
Percent of adults (≥18 years) with current Asthma ^{1,7}	5.7	6.6	6.1	6.5

Since 2004 there has been a huge push for asthma education within SPA 2. Additional research should occur to determine what corrective measures could be responsible for the sharp decline in children 0-17. As stated in the footnotes new weights were used to measure so this may contribute to the decrease along with more parents receiving information on dust free homes, eliminating cockroaches, and using proper cleaning supplies and pesticides. Air quality has seen improvements since 2000. New weights were used beginning March 20, 2006 which may also be responsible for the downward slope.

Children (0-17 years) with Asthma ^{1,7}

Adults (≥18 years) with Current Asthma ^{1,7}

Source: Los Angeles County Health Survey (2005, 2002/2003, 1999/2000, 1997), Los Angeles County Dept. of Public Health, Office of Health Assessment and Epidemiology.

* 2002-2003 Los Angeles County Health Survey estimates may differ from prior estimates as new weights were utilized beginning March 20, 2006.

⁶ Asthma prevalence consists of those ever diagnosed with asthma by a health care provider and reported still having asthma and/or having had an asthma attack in the past 12 months.

SPA 2 Insurance, Access to Care and Immunization Trend Data:

Insurance, Regular Source of Care, Immunizations

Indicators	SPA 2				L.A. County			
	1997	1999/2000	2002/2003	2005	1997	1999/2000	2002/2003	2005

Source: 2005 Los Angeles County Health Survey; Office of Health Assessment and Epidemiology, Los Angeles County Department of Public Health.

Note: Estimates are based on self-reported data by a random sample of 8,648 Los Angeles County adults, representative of the adult population in Los Angeles County. The percentages and numbers are the best estimates of the actual prevalence of each described characteristic in the population. The 95% confidence intervals (CI) represent the variability in the estimate due to sampling; the actual prevalence in the population, 95 out of 100 times sampled, would fall within the estimate.

*The estimate is statistically unstable (relative standard error >23%) and therefore may not be appropriate to use for planning or policy purposes.

-For purposes of confidentiality, results with cell sizes less than 5 are not reported.

4. Weight status is based on Body Mass Index (BMI) calculated from self-reported weight and height. According to NHLBI clinical guidelines, a BMI < 18.5 is underweight, a BMI ≥ 18.5 and < 25 is normal weight, a BMI ≥ 25 and < 30 is overweight, and a BMI ≥ 30 is obese. [REFERENCE: National Heart, Lung, and Blood Institute (NHLBI) http://www.nhlbi.nih.gov/guidelines/obesity/ob_exsum.pdf]

9. Unhealthy days refers to a composite of the number of reported poor physical and/or mental health days in the past month.

10. Disability is defined as a positive response to any one of the following: 1) Limited activity because of physical, mental, or emotional problem(s); 2) Health problem requiring use of special equipment; 3) Self-perception of disabled.

11. Children with Special Health Care Needs (CSHCN) Screening Tool from the FACCT - Foundation for Accountability. The CSHCN screener has three "definitional domains." These are:

(1) Dependency on prescription medications; (2) Service use above that considered usual or routine; and (3) Functional limitations. The definitional domains are not mutually exclusive categories.

A child meeting the CSHCN screener criteria for having a chronic condition may qualify for one or more definitional domains. [REFERENCE: <http://www.facct.org/cahmiweb/chronic/Screeners/twiscree.htm>]

Oral Health:

Access to oral health care remains a concern for SPA 2 residents. A concern for families that are uninsured with kindergarten and first grade students at home is complying with AB 1433 (Assembly Bill 1433 Oral Health Assessment bill. Some educators are concerned that low-income families will not have access to care and that there may be compliance issues with paperwork that is required. The text below is from the following website: <http://infor.sen.ca.gov>.

SENATE HEALTH BILL NO: AB 1433 AUTHOR: Emmerson and Laird SUBJECT Pupil health: oral health assessment

SUMMARY

“This bill requires a pupil attending a public school while in kindergarten or 1st grade to present proof by May 31st of each year of having received an oral health assessment by a licensed dentist or other licensed or registered dental health professional no earlier than 12 months prior to the date of the initial enrollment. Requires public schools to send a notification of the assessment requirement to the parent or guardian of the pupil, as specified, and to send a report, as specified, to the public health department of the county in which the school is located.”

AB 1433 was designed with the intent to minimize or eliminate the significant number of days of education lost due to dental diseases such as toothaches and abscesses.

The CDA (California Dental Association), as a public service on website <http://www.cda.org/clinics?action=search&zip>

Provides the ability to search for clinics that offer free or discounted dental services to those in need. VCCC staff searched each zip code in the San Fernando and Santa Clarita Valley and there were only four in the San Fernando Valley and one in the Santa Clarita Valley. Northeast Valley Health Corporation is listed in Valencia, San Fernando, and Pacoima. Telfair PTA Dental is listed in Pacoima and PTA in San Fernando. This information will be added to the VCCC resource directory along with the 79 SPA 2 providers listed on the County of Los Angeles-Department of Public Health Public Health-Children’s Medical Services Child Health and Disability Prevention Program Dental Providers that accept Medi-Cal, sliding scale, and/or payment plans.

Tooth decay is the most common chronic childhood disease-five times more common than asthma in 5 to 17 year olds, as stated on the May 2000 fact sheet from the Office of the Surgeon General.

SPA level data was not available for Denti-Cal beneficiary counts; however, Los Angeles County data was located from 2007 California Healthcare Foundation.

BENEFICIARY COUNTS AND FFS EXPENDITURES, BY COUNTY AND AGE GROUP 2004
DENTI-CAL FACTS AND FIGURES

Beneficiaries Using Services		Share of Medi-Cal	Fee For Service Expenditures		
Age Category	Denti-Cal Number		Total	Average Per User	
0 to 5	135,223	22.1%	\$38,135,953	\$282	
6 to 12	214,208	40.3%	\$54,965,101	\$257	
13 to 20	121,818	26.8%	\$37,990,420	\$312	
21 to 64	228,848	21.7%	\$77,263,464	\$338	
65+	101,705	31.1%	\$36,881,732	\$363	

According to the California HealthCare Foundation report nearly all of the Medi-Cal population has access to Denti-Cal. “However, while nearly all of the Medi-Cal population has access to the benefit, they typically encounter serious difficulties in actually seeing a dentist. California’s reimbursement rates for publicly funded dental care are among the lowest in the nation, well below the fees charged by most dentist. As a result, less than half of dental practices accept Denti-Cal patients, and access to specialty care, such as pediatric dentistry and orthodontics, is very limited.”

The California Health Interview Survey was accessed to retrieve SPA 2 data in four categories.

2005: Time since last dental visit (Child 2-17 or younger if tooth present):

- 23.3% Never been to a dentist
- 49.3% Less than 6-months ago
- 23.0% Six months to a year ago

Dental Insurance Available (Child 2-17 or younger if tooth present):

- 78.8% has dental insurance
- 21.2% does not have dental insurance

2003: Could not afford dental care that was needed (All ages >2 or younger if tooth present)

- 16.7% could not afford dental care
- 83.3% could afford dental care

The 16.7% of respondents that answered they could not afford dental care where then asked the reason for visiting a dentist or dental clinic 48.2% stated for a regular check-up however, 49.6% had dental problems but could not afford dental care.

SPA 2 Hospital Diversion Rates:

Two hospitals, Pine Grove (82 beds) and Granada Hills (141 beds) closed in 2003 prior to the last needs assessment. In 2004, Northridge Hospital-Sherman Way Campus closed, eliminating 209 beds. According to the 2006-2007 San Fernando Valley Economic Report, operating cost exceeded revenues for the fifth consecutive year. Hospital profitability is 50/50 with half the hospitals reporting profits and the other half reporting losses.

One of the major issues facing SPA 2 hospitals in the past few years has been hospital diversion to (911) traffic due to Emergency Department (ED) saturation. The San Fernando Valley hospitals saw a major peak in diversion times in 2005 when diversion rates were averaging 32.5% which was in excess of the Los Angeles County rate of 26.9%. Henry Mayo Hospital is measured with the Antelope Valley–Newhall region fared better at 23.3%.

Multiple issues can cause a hospital to go to diversion status. Some examples may include lack of beds for inpatient admits, lack of ICU beds, and overcrowded ED's. Diversion rates occur when a hospital's ED is crowded and reaches a point where it becomes unsafe to accept additional patients. As a result, hospitals will not accept ambulance patients until the ED clears out, which can take hours. When one hospital goes on diversion, it influences the surrounding hospitals and affects the continuity of care a patient may receive while the ambulance has to be diverted to another hospital.

To help control the high percentages of diversion rates, revised hospital guidelines went into place.

The average incidence of ED Saturation from 2005 to 2007:

Year	Los Angeles County (n=74)	San Fernando Valley Region (n=16)	Antelope Valley –Newhall Region (n=3)
2005	26.9%	32.5%	23.3%
2006	15.8%	16.0%	9.2%
2007	15.3%	16.0%	10.5%

From 2005 to 2006 noticeable declines occurred in all three of the regions discussed above; however, from 2006 to 2007, Los Angeles County has seen additional decreases in the diversion rate while the San Fernando Valley region has remained at 16% and the Antelope Valley Newhall Region has seen an increase from 2006 to 2007.

SPA 2 Crime Statistics:

In 2005, there were 100,998 juvenile felony arrest in SPA 2. The majority of the arrest; 5,190 were classified as misdemeanor offenses, 3,238 as status offenses and 2,570 as felony level offenses. Juveniles committed 18 homicides, 6 forcible rapes, 142 robberies, 364 assaults, 454 burglaries, 173 thefts, 248 motor vehicle thefts, 259 drug related offenses and 806 crimes that were classified as other offenses.

In 2005, there were 23,963 adult misdemeanor arrests in SPA 2. Misdemeanor arrests in SPA 2 consisted of 1,755 assault battery, 2,353 petty thefts, 128 other thefts, 3,782 drug, 1,053 prostitution, 1,028 drunk, 27 disorderly conduct, 97 disturbance of the peace, 174 vandalism, 4,212 DUI's (driving under the influence), 437 other traffic violations and 8,927 other arrest.

In 2005, there were 17,468 adult felony arrests in SPA 2. Felony arrests consisted of 96 homicides, 45 forcible rapes, 575 robberies, 3,458 assaults, 1,609 burglary, 1,860 thefts, 1,026 motor vehicle thefts, 416 forged checks and credit cards, 147 sex, 6,098 drugs, and 2,138 other arrests.

Drug related and driving under the influence arrests account for the bulk of all arrests in the three categories discussed above. For example, 35% of adult felony arrests were drug related arrests. Under misdemeanor arrests, driving under the influence accounted for approximately 18% and drugs accounted for another 16% of misdemeanor crimes. The statistics discussed here and in the above three paragraphs can be found at http://stats.doj.ca.gov/cjsc_stats/prof05/index.htm.

According to the Compstat reports as of May 14, 2007, preliminary statistics have been posted. Note that these statistics are subject to further analysis and revision and are only presented as a quick overview of the local police departments to date as of 5-14-07. The percent of change is looking at year to date (YTD) 2007 in comparison to 2006. Additional information can be found under Appendix C where the profiles are provided.

Geographic Bureau: Valley

Devonshire Area Profile	Total violent crime(YTD 2007 = 210) down 11% all arrests down 6% (YTD 2007 =1,339)
Foothill Area Profile	Total violent crime (YTD 2007=336) up 18%% all arrests up 6% (YTD 2007 = 2,159)
Mission Area Profile	Total violent crime (YTD 2007 = 396) down 4% all arrests up 3% (YTD 2007 = 3,043)
North Hollywood Profile	Total violent crime (YTD 2007 = 433) down 6% all arrests down 10% (YTD 2007 = 2,496)
Van Nuys Profile	Total violent crime (YTD 2007 = 490) down 8% all arrests down 6% (YTD 2007 = 3,778)
West Valley Profile	Total violent crime (YTD 2007 = 431) down 8% all arrests up 6% (YTD 2007 = 2,602)

There were 8,198 domestic violence-related calls for 911 assistance in 2005. No weapon(s) was involved or reported in 2,065 of the calls and for 6,133 calls, a weapon(s) was involved. Those calls that involved a weapon(s) include 77 firearms, 188 knives or cutting instruments, 934 other dangerous weapons, and 4,934 personal weapons (hands, feet, etcetera). According to penal code, section 13730 does not require that the type of weapon involved in a domestic violence-related call be reported.

Gang-related crime has increased 44% in the Valley Bureau stations as a whole when comparing December 2006 to December 2005. The Devonshire Station was the only office to see a decline in gang-related crime; all other five stations experienced increases. When assessing the five year to date averages, the percentage change has increased 18% in the past five years.

DECEMBER 2006, SUMMARY REPORT GANG-RELATED CRIMES

Geographic Bureau: Valley

Geographic Area	This Month	This month Last Year	Year-To- Date	Last Year-To Date	% Change Year-To-Date	YTD 5Yr Average	%Change To 5YR Average
Devonshire	6	4	126	140	-10.0	195.2	-35.5
Foothill	27	24	336	292	15.1	355.8	-5.6
Mission	28	8	355	133	166.9	97.6	263.7
North Hollywood	28	10	245	169	45.0	217.6	12.6
Van Nuys	32	22	214	155	38.1	227.6	-6.0
West Valley	11	16	201	137	46.7	151.2	32.9
Bureau Totals	132	84	1477	1026	44.0	1245.0	18.6

According to the same report, Los Angeles County reported 7714 gang-related crimes. Therefore, just over 19% of gang-related crimes in Los Angeles County occur in SPA 2. The top five gang-related crimes according to the Los Angeles Police Department Gang and Operations Support Division as of December 2006 for all of Los Angeles County include felony assault (2,877), robbery (2,515), witness intimidation (816), attempted homicide (707), and homicide (272).

The Mission Bureau has seen the largest increase 166.9% over last year and 263.7% over the past five years. The areas covered by the Mission Area Bureau include Granada Hills, Knollwood, Mission Hills, North Hills, Panorama City, and Sylmar. In comparison, the Devonshire Bureau has seen a decrease from year-to-date 2006 of 10% and a five-year average percentage decrease in gang-related crime of 35.5%. The Devonshire Area Bureau services Canoga Park, Chatsworth, Granada Hills, Northridge, Porter Ranch, West Hills, and Winnetka.

According to www.lapdonline.org, a gang injunction has been placed on four gangs. “A gang injunction is a restraining order against a group. A civil suit seeks a court order declaring the gang’s public behavior a nuisance and asks for special rules directed toward its activity. Injunctions can address the neighborhood’s gang problem before it reaches the level of felony crime activity.” Valley gangs with injunctions include Blythe Street, Canoga Park Alabama, Langdon Street, and Pacoima Project Boys.

ANALYTICAL METHODS AND KEY FINDINGS BY TARGET GROUPS

With our primary investigation, 144 surveys were completed at a return rate of 67.9%. Each participating organization ranked their top five priorities based on the 5-point Likert scale--1 being the top most priority and 5 being the least priority. Numbers 1 through 5 were assigned point values: (1=5 points, 2=4 points, 3=3 points, 4=2 points, and (5=1 point). The top five issues were aggregated per the total points by target population group: children (ages 0-17), adults (ages 18-64), seniors (ages 65 and over), and poor. For open-ended questions, a qualitative approach was adopted to provide a narrative synopsis to supplement the point value system. The key finding indicates that the top priority is mental health services (287 total points), followed by health insurance (202 total points), chronic disease management (133 total points), affordable housing (131 total points), and dental care (121 total points).

1. Affordable and accessible mental health services and prevention programs for low-income, homeless, and undocumented individuals and families; more trained workers to be culturally sensitive and language appropriate
2. Universal health coverage for everyone; more clinics accepting subsidized health insurance
3. Chronic disease prevention and intervention at early age; affordable or low-cost medication for individuals with chronic disease(s)
4. Housing financial assistance programs for low to middle incomes families and seniors and sufficient transitional housing for homeless, re-entry populations, and substance abusers
5. Dental prevention programs at early childhood; low-cost dental services for uninsured and disadvantaged

Mental Health

In terms of mental health services, a majority of participating agencies commented that more prevention programs and counseling services should be made affordable and accessible for low-income, homeless, and undocumented individuals and families. Respondents also addressed that agency staff members need to be trained to be culturally sensitive and language appropriate when providing services to mentally vulnerable clients. Respondents indicated that they are lacking of referral ability due to limited resources in the community they served. .

Access to Health Care

Health insurance ranked as the second crucial priority that needs to be addressed. Most respondents were prone to advocating for comprehensive universal health coverage, especially more and more employers tend to cut out health benefits. If that's not the case in the near future, respondents expressed that affordable health insurance, removal of pre-existing condition clauses, and free clinic or clinic accepting subsidized health insurance could be other alternatives to prevent the overflow of Emergency Rooms. The majority of respondents for agencies serving SPA 2 residents across all target groups felt that it is time for some form of Universal Health Care to cover all populations. In addition, it was felt that additional clinic capacity is needed to serve the uninsured. Fewer respondents suggested less complicated enrollment criteria and paperwork for Medi-Cal and other low cost coverage plans.

Chronic Disease Management

For chronic disease management, asthma, diabetes, and obesity were identified as prevalent diseases that need to be addressed. To prevent diabetes and obesity, respondents suggested that prevention programs about nutrition and exercise should target early age in schools and made provide outreach education to parents and at-risk adults at grocery stores. In addition, community-wide physical space should be made accessible and safe for exercise. To prevent asthma and respiratory risks, respondents indicated that air quality and lead testing should be constantly monitored. In addition, low-cost medication for asthma was specified as another area of concern.

Affordable Housing

In terms of affordable housing, respondents proposed that more housing financial assistance programs should be made available for low to middle income families and seniors in case of financial emergency. Besides financial assistance programs, respondents were concerned with the absence of sufficient product housing and emergency/transitional housing for homeless, re-entry population, and substance abusers.

Oral Health

Concerning dental care, respondents advocated for more prevention programs at early childhood as well as low cost dental services for the uninsured and for the disadvantaged.

Table of the point values for the key areas of need according to SPA 2 respondents:

	PV for Poor n=37	PV for 0-17 n=35	PV for 18-64 n=38	PV for 65+ n=34	Total N=144
Needs/Issues					
Chronic disease management (e.g. diabetes, asthma)	46	-	39	48	133
Dental care o Affordable o Accessible	42	43	36	-	121
Health insurance that is affordable and portable	65	41	96	-	202
Mental health services o Affordable o Accessible	81	71	75	60	287
Case management services for individuals and families	-	28	-	38	66
Coordination between agencies of programs & services	-	37	-	-	37
Housing that is affordable	52	-	37	42	131
Home care and long-term care services that is affordable	-	-	-	39	39

KEY FINDINGS BY TARGET GROUP

This section provides an overview of the key issues and needs identified for the four key target groups—children, adults, seniors, and poor and medically indigent—from our primary and secondary data compiled for this project.

CHILDREN (Ages 0-17)

Based on our primary survey conducted with 35 respondent agencies that serve children aged between 0-17, the key priority needs for children in SPA 2 are listed as follows:

- Affordable and accessible mental health services (71 points): respondents felt that there isn't enough psychiatric beds or inpatient psychiatric facilities for teens
- Affordable and accessible dental services (43 points): respondents felt that a) more funding needs to be secured to reimburse pediatric dentists; b) free dental examinations or screenings needs to be provided to children; and c) preventive oral/dental education should be made available at early age
- Affordable and portable health insurance (41 points): respondents felt that public policy change should be advocated to stop gaps in accessing health care
- Coordination between agencies, programs and services (37 points): respondents felt areas need to be coordinated are a) transportation for children; b) domestic child abuse; c) tutoring/after school programs; and d) more safe and green space that is safe for children to increase physical activity and well being
- Case management for individuals and families (28 points): respondents felt that parents need to be more involved in a) children's school and recreational activities, and b) teen pregnancy

Descriptive statistics presented below provide readers a review of the demographic distributions, service utilizations, and health indicators of children in SPA 2:

Demographics

- In 2006, children comprised 25.6% of the population in the San Fernando Valley (SFV) and 28.7% in the Santa Clarita Valley (SCV). Communities with the highest number of children in SPA 2 were:

San Fernando Valley

- Van Nuys (51,665)
- North Hollywood (45,304)
- Glendale (38,997)

Santa Clarita Valley

- Canyon Country (19,955)
- Valencia (15,010)

Mental Health Services

The top five admission diagnoses for children 0-15 during fiscal year 2005-2006 were:

- 1,004 (31.38%) Attention-Deficit/Hyperactivity Disorder, Hyperactive Impulse Type
- 710 (22.19%) Oppositional Defiant Disorder,
- 188 (5.88%) Attention-Deficit/Hyperactivity Disorder, Predominantly Inattentive Type
- 147 (4.60%) Attention-Deficit/Hyperactivity Disorder NOS
- 115 (3.60%) Generalized Anxiety Disorder

(Children (ages 16 and 17) are categorized as transitional age youth by Los Angeles Department of Mental Health. Please refer to the following section under Adults for further reference)

Dental Services:

- Seventeen percent (17%) of children ages 0-17 in SPA 2 did not obtain dental care (including check-ups) because they could not afford it; East Valley Health District has highest percent (20.5%) of children that lack access to dental services

Access to Health Care/Health Insurance:

- In 2005, approximately 44,000 (8.2%) children were uninsured in SPA 2. West Valley Health District had the highest number of uninsured children (19,000) among the four health districts in SPA 2, followed by San Fernando Health District (10,000), East Valley Health District (9,000), and Glendale (6,000).
- About 29.1% of children in SPA 2 had difficulty accessing medical care in 2005. East Valley Health District had the highest percent (39.3%) of children with difficulty accessing medical care.
- More than 30,000 children in SPA 2 had no regular source of medical care in 2005. West Valley Health District had highest number of children (138,000) who had no regular source of medical care among the four health districts in SPA 2.
- For calendar year 2005, the most common diagnoses for children seen in the Emergency Departments within SPA 2 were:
 - Symptoms, signs and ill-defined conditions (SPA 2 = 18,556; SFV = 16,490; SCV = 2,066)
 - Acute Upper Respiratory Infection, multiple sites (SPA 2 = 8,001; SFV = 7,257; SCV = 744)
 - Otitis Media, Suppurative (SPA 2 = 7,869; SFV = 7,228; SCV = 641)
 - Viral Infection of unspecified site (SPA 2 = 5,137; SFV = 4,862; SCV = 275)
 - Other Open Wound of Head (SPA 2 = 4,940; SFV = 4,263; SCV = 677)
- In SPA 2, the most common inpatient diagnostic related groups (DRGs) for calendar year 2005 for children were:
 - Pregnancy and Childbirth Related Diagnoses (SPA 2 = 28,940; SFV = 25,419; SCV = 3,521)
 - Affective Psychoses (SPA 2 = 637; SFV = 572; SCV = 65)
 - Acute Appendicitis (SPA 2 = 606; SFV = 543; SCV = 63)
 - Pneumonia (SPA 2 = 605; SFV = 519; SCV = 86)
 - Bronchitis/Bronchiolitis (SPA 2 = 497; SFV = 433; SCV = 64)

Other Indicators:

- For the year of 2005, 17.9% of children ages 0-17 had special health care needs in SPA 2 as compared to 15.7% in Los Angeles County. West Valley Health District had highest percent of children (19.9%) with special health care needs, followed by East Valley Health District (18.8%), San Fernando Health District (16.7%), and Glendale Health District (15.1%). This measure is based on Children with Special Health Care Needs (CSHCN) Screening Tool from Foundation for Accountability (FACCT). The screening tool has three definitional domains that include dependency on prescription medications, excessive or routine use of prescription drugs, and functional limitations.
- In 2005, 20.8% of overweight children in grades 5, 7, and 9 were overweight (BMI above 95 percentile). Body Mass Index (BMI) measures a person's weight and height and is used by doctors to determine if a person is at a healthy weight.
- The prevalence of asthma among children in SPA 2 was 7.9% in 2005. Of approximately 44,000 children with asthma, San Fernando Health District had the highest percent of children (11.6%) with asthma.
- SPA 2 had high percent (40.2%) of children ages 0-5 years for which parents report difficult finding childcare, whereas LA County had 35.8%.
- SPA 2 was the second highest among SPAs that reported 23, 321 referrals pertaining to child abuse to emergency response compared to a total of 154,993 child abuse and neglect cases reported to Los Angeles County (SPA 1=10,413; SPA 3=19,528; SPA 4=15,729; SPA 5=3,618; SPA 6=26,385; SPA 7=19,518; SPA 8=16,148)
- In terms of accidental injury death rate per 100,000 children ages 0-17, the death rate in SPA 2 (5.4) was higher than Los Angeles County (5.1), which ranked the second highest among SPAs (SPA 1=11.5; SPA 3=2.2; SPA 4=3.9; SPA 5=5.3; SPA 6=5.0; SPA 7=3.8; SPA 8=3.9)

ADULTS (Ages 18 to 64)

According to our survey interviews with 38 respondent agencies serving adults between 18-64 years old, the key priority needs for this target population are:

- Affordable and portable health insurance (96 points): respondents felt that SPA 2 needs to advocate for a) securing more funds for clinics to provide free or low-cost care to working poor who cannot afford health insurance or who can only afford subsidized insurance; b) extending clinic hours during evenings and weekends for people who work full time; c) removing pre-existing condition clauses; and d) assisting small employers or individuals in obtaining low cost coverage
- Affordable and accessible mental health services (75 points): respondents felt that areas need to focus on are a) increasing capacity for adults accessing lower level mental health services (e.g. depression, anxiety etc); b) more trained counselors to be culturally sensitive and language appropriate
- Chronic disease management (39 points): respondents felt that areas need to be aimed at are a) care management and follow up; b) more access to primary care and specialty services; and c) intervention and education at grocery stores
- Affordable housing (37 points): respondents felt that SPA 2 lacks of a) emergency/transitional housing for indigent adults with chronic mental illness and for substance abusers; b) housing financial assistance programs for families with limited income

- Affordable and accessible dental services (36 points): respondents felt that more affordable and accessible dental services should be made available for working poor

The following descriptive statistics give readers a review of the demographic distributions, service utilizations, and health indicators of adults in SPA 2:

Demographics:

For the year of 2006

- Adults (ages 18 to 64 comprised 63.5% (1,187,757) of the population in the San Fernando Valley (SFV) and 64.4% (156,674) in the Santa Clarita Valley (SCV). San Fernando Valley had 2.7% increases in adult population from 2002 to 2006 whereas Santa Clarita Valley had 2.8% increases. Communities with highest number of adult population in SFV and SCV were:

San Fernando Valley

- Glendale (119,742)
- Van Nuys (116,782)
- North Hollywood (107,622)

Santa Clarita Valley

- Canyon Country (42,387)
- Valencia (32,884)

- Young adults (ages 18-34) comprised 23.30% (436,034) of the total population in the San Fernando Valley (SFV) and 21.90% (53,304) in Santa Clarita Valley (SCV).

- Communities with highest number of adult population in SFV and SCV were:

San Fernando Valley

- Van Nuys (47,593)
- North Hollywood (44,389)
- Glendale (40,370)

Santa Clarita Valley

- Canyon Country (15,175)
- Valencia (9,249)

- Middle age adults (ages 35-44) made up 15.91% (297,770) of the total population in the San Fernando Valley (SFV) and 18.05% (43,929) in Santa Clarita Valley (SCV). Communities with highest number of adult population in SFV and SCV were:

San Fernando Valley

- Van Nuys (31,061)
- Glendale (30,377)
- North Hollywood (28,242)

Santa Clarita Valley

- Canyon Country (11,565)
- Valencia (9,516)

- Young older adults (45-64) comprised 24.25% (453, 953) of the total population in the San Fernando Valley (SFV) and 24.42% (59,441) in the Santa Clarita Valley (SCV).

- Communities with highest number of adult population in SFV and SCV were:

<u>San Fernando Valley</u> <ul style="list-style-type: none"> ▪ Glendale (48,995) ▪ Van Nuys (38,128) ▪ North Hollywood (34,991) 	<u>Santa Clarita Valley</u> <ul style="list-style-type: none"> ▪ Canyon Country (15,647) ▪ Valencia (14,119)
---	--

Access to Health Care/Health Insurance:

- Approximately 19.8% of adult population (ages 18 to 64) are uninsured. East Valley Health District has the highest percent of uninsured adults (26%)
- SPA has 19.9% of adults have no regular source of health care. West Valley Health District has the highest percent of adults have no regular source of care (22.3%)
- For calendar year 2005, the most common ambulatory surgery diagnoses for (ages 18 -34) within SPA 2 were:
 - Missed Abortion (SPA 2 = 457; SFV = 394; SCV = 63)
 - Back Disorder (SPA 2 = 359; SFV = 292; SCV = 67)
 - Cholelithiasis (SPA 2 = 335; SFV = 296; SCV = 39)
 - Contraceptive Management (SPA 2 = 324; SFV = 295; SCV = 29)
 - Chronic disease of tonsils and adenoids (SPA 2 = 314; SFV = 267; SCV = 47)
- For calendar year 2005, the most common ambulatory surgery diagnoses for (ages 35-64) within SPA 2 were:
 - Other Benign Gastrointestinal Neoplasm (SPA 2 = 4,074; SFV = 3,748; SCV = 326)
 - Special Screening for Malignant Neoplasm's (SPA 2 = 3,584; SFV = 3,158; SCV = 426)
 - Back Disorder (SPA 2 = 3,013; SFV = 2,221; SCV = 792)
 - Intervertebral Disc Disease (SPA 2 = 2,078; SFV = 1,549; SCV = 529)
 - Cataract (SPA 2 = 2,076; SFV = 1,843; SCV = 233)
- The most common diagnoses for adults (ages 18-34) in the Emergency Departments are:
 - Symptoms, signs and ill-defined conditions (SPA 2 = 20,062; SFV = 18,219; SCV = 1,843)
 - Sprain of Back (SPA 2 = 3,006; SFV = 2,742; SCV = 264)
 - Hemorrhage in Early Pregnancy (SPA 2 = 2,482; SFV = 2,249; SCV = 233)
 - Acute Pharyngitis (SPA 2 = 2,032; SFV = 1,864; SCV = 168)
 - Other Cellulitis/Abscess (SPA 2 = 1,922; SFV = 1,769; SCV = 153)

- The most common diagnoses for adults (ages 35-64) in the Emergency Departments are:
 - Symptoms, signs and ill-defined conditions (SPA 2 = 36,283; SFV = 32,704; SCV = 3,579)
 - Back Disorder (SPA 2 = 4,453; SFV = 4,005; SCV = 448)
 - Sprain of Back (SPA 2 = 3,781; SFV = 3,402; SCV = 379)
 - Other Cellulitis/Abscess (SPA 2 = 2,779; SFV = 2,569; SCV = 210)
 - Open Wound of Finger (SPA 2 = 2,179; SFV = 1,988; SCV = 191)
- In SPA 2, the most common inpatient diagnostic related groups (DRGs) for calendar year 2005 for adults (ages 18-34) are:
 - Pregnancy and Childbirth Related Diagnoses (SPA 2 = 23,044; SFV = 20,300; SCV = 2,744)
 - Affective Psychoses (SPA 2 = 1,147; SFV = 1,011; SCV = 136)
 - Schizophrenic Disorders (SPA 2 = 721; SFV = 686; SCV = 35)
 - Acute Appendicitis (SPA 2 = 719; SFV = 641; SCV = 78)
 - Cholelithiasis (SPA 2 = 476; SFV = 423; SCV = 53)
- The most common inpatient diagnostic related groups (DRGs) among adults (ages 35-64) for calendar year 2005 are:
 - Pregnancy and Childbirth Related Diagnoses (SPA 2 = 6,659; SFV = 5,812; SCV = 847)
 - Respiratory System/Other Chest Symptoms (SPA 2 = 3,276; SFV = 2,780; SCV = 496)
 - Affective Psychoses (SPA 2 = 2,632; SFV = 2,408; SCV = 224)
 - Schizophrenic Disorders (SPA 2 = 2,632; SFV = 1,757; SCV = 56)
 - Other Chronic Ischemic Heart Disease (SPA 2 = 1,811; SFV = 1,604; SCV = 207)

Mental Health Services:

- SPA 2 has approximately 197,000 (12.8%) adults diagnosed with Depression, the West Valley Health District has the highest number of 87,000 adults (14%) diagnosed with Depression
- The rate of unintentional drug-related death among adults (per 100,000 population) is 4.7
- Binge drinking (5 or more alcoholic drinks for men/4 for women) on at least one occasion in the last 30 days is 18.3 among adults in SPA 2, which is the second highest percent as compared to other SPAs
- The top 5 admission diagnoses for transitional youth (ages 16-25) during fiscal year 2005-2006 are:
 - 300 (10.11%) Oppositional Defiant Disorder
 - 273 (9.2%) Attention-Deficit/Hyperactivity Disorder, Hyperactive Impulse Type
 - 200 (6.74%) Major Depressive Disorder, Recurrent, Moderate
 - 199 (6.71%) Cannabis Abuse
 - 148 (4.99%) Schizophrenia, Paranoid Type

For adults (ages 26 to 59), the common admission diagnoses during fiscal year 2005-2006 are:

- 914 (14.86%) Schizophrenia, Disorganized Type
- 867 (14.09%) Major Depressive Disorder, Recurrent, Moderate
- 680 (11.05%) Major Depressive Disorder, Recurrent, Severe without Psychotic Features
- 630 (10.24%) Major Depressive Disorder, Recurrent, Severe with Psychotic Features
- 369 (6.0%) Major Depressive Disorder, Recurrent, Unspecified

(Adults aged 60 and over is categorized as older adults by Los Angeles Department of Mental Health, please refer to the following section under seniors for further reference)

Chronic Disease Management:

- SPA 2 ranks high among SPAs for having 183.8% of adults diagnosed with high cholesterol whereas LA County has 176.1%
- Approximately 21.4% of adults have been diagnosed with hypertension in SPA 2
- Cardiovascular and related disease mortality rates per 100,000 population in SPA 2 are Coronary Heart Disease at the rate of 183.8, Diabetes at 21.3, Stroke at 48.7, and Stroke for African American at 110.2
- About 95,000 adults (18 and above) are diagnosed with Diabetes, the San Fernando Health District has the largest percent of adults with Diabetes at 7.5%
- Overweight adults make up 20.8% of the total population in SPA 2 whereas 17% of adults are considered obese
- In SPA 2, 6.6% of adults with current Asthma (ever diagnosed with Asthma and reported still have Asthma and/or had an Asthma attack in the past year), Glendale Health District has the highest percent of adults with current Asthma among Health Districts

Dental Services:

- In SPA 2, approximately 24% (375,000) of adults did not obtain dental care in the past year because they could not afford it. East Valley Health District has the highest percent of adults were not able to obtain affordable dental care

SENIORS (Ages 65 and Over)

Per our survey interviews with 34 respondent agencies, serving seniors aged 65 or over, the key priority needs for this target population are:

- Affordable and accessible mental health services (60 points):
- Chronic disease management (48 points): care management and follow up, more access to primary care and specialty services
- Affordable housing (42 points): respondents felt that more housing assistance programs need to be made available for seniors in case of financial emergency and for low income frail elderly
- Affordable home care and long-term care services (39 points):
- Case management services for individuals and families (38 points)

The following descriptive statistics provide a review of the demographic distributions, service utilizations, and health indicators of seniors in SPA 2:

Demographics:

For the year of 2006

- Seniors (ages 65 and over) comprised 10.52% of the population in SPA 2 (10.99% in San Fernando Valley and 6.92% in Santa Clarita Valley).
Communities with highest number of adult population in SFV and SCV were:

San Fernando Valley	Santa Clarita Valley
▪ Glendale (26,654)	▪ Valencia (4,307)
▪ Van Nuys (14,958)	▪ Canyon Country (4,192)
▪ Burbank (14,122)	

- Young seniors (ages 65-84) made up 9.07% of the population in SPA 2 (9.45% in San Fernando Valley and 6.12% in Santa Clarita Valley).
Communities with highest number of adult population in SFV and SCV were:

San Fernando Valley	Santa Clarita Valley
▪ Glendale (22,688)	▪ Canyon Country (3,824)
▪ Van Nuys (12,691)	▪ Valencia (3,663)
▪ Burbank (11,841)	

- Old seniors (ages 85 and over) comprised 1.45% of the population in SPA 2 (1.54% in San Fernando Valley and 0.8% in Santa Clarita Valley).
Communities with highest number of adult population in SFV and SCV were:

San Fernando Valley	Santa Clarita Valley
▪ Glendale (3,966)	▪ Valencia(644)
▪ Burbank (2,281)	▪ Newhall (541)
▪ Van Nuys (2,267)	

- By 2030, seniors will nearly triple and it is estimated that more than 6 out of 10 will be managing more than one chronic disease. In addition, 1 out of 3 will be considered obese and 1 out of 4 will be living with diabetes. (Source: When I'm 64-How Boomers Will Change Health Care, May 2007 Published by the American Hospital Association and First Consulting Group. www.aha.org)

Mental Health Services:

For seniors (ages 60 or over), the top 5 admission diagnoses during fiscal year 2005-2006 are:

- 135 (17.33%) Major Depressive Disorder, Recurrent, Moderate
- 107 (13.74%) Major Depressive Disorder, Recurrent with Psychotic Features
- 104 (13.35%) Major Depressive Disorder, Recurrent without Psychotic Features
- 88 (11.30%) Schizophrenia, Residual Type
- 52 (6.68%) Major Depressive Disorder, Recurrent, Unspecified

The 2005 California Health Interview Survey estimates

- 55.6% of disabled older adults due to physical, mental, or emotional disorder
- 9.9% older adults 65 years or older needed help for emotional/mental health problems
- 47.2% mental health treatment for senior population are not covered by the insurance

Access to Health Care/Health Insurance:

- Approximately 61% of adults (ages 65 or older) were vaccinated for influenza in the past year
- For calendar year 2005, the most common inpatient diagnostic related groups (DRGs) among adults aged 65 or over are:
 - Heart Failure (SPA 2 = 4,154; SFV = 3,829; SCV = 325)
 - Pneumonia (SPA 2 = 3,424; SFV = 3,098; SCV = 326)
 - Other Chronic Ischemic Heart Disease (SPA 2 = 2,518; SFV = 2,304; SCV = 214)
 - Septicemia (SPA 2 = 2,516; SFV = 2,424; SCV = 92)
 - Rehabilitation Procedure (SPA 2 = 2,432; SFV = 2,185; SCV = 247)
- For seniors treated in the Emergency Departments within SPA 2, the most common diagnoses are:
 - Symptoms, signs and ill-defined conditions (SPA 2 = 15,405; SFV = 14,315; SCV = 1,090)
 - Other Urinary Tract Disorders (SPA 2 = 1,490; SFV = 1,396; SCV = 94)
 - Other Open Wound of Head (SPA 2 = 1,263; SFV = 1,175; SCV = 88)
 - Essential Hypertension (SPA 2 = 1,134; SFV = 1,074; SCV = 60)
 - Cardiac Dysrhythmias (SPA 2 = 1,054; SFV = 970; SCV = 84)

For calendar year 2005, the most common ambulatory surgery diagnoses for ages 65 & up within SPA 2 were:

- Cataract (SPA 2 = 9,102; SFV = 8,437; SCV = 665)
 - Other Benign Gastrointestinal Neoplasm (SPA 2 = 3,285; SFV = 3,129; SCV = 156)
 - Back Disorder (SPA 2 = 2,414; SFV = 1,946; SCV = 468)
 - Diverticula on Intestine (SPA 2 = 1,725; SFV = 1,637; SCV = 88)
 - Gastritis and Duodenitis (SPA 2 = 1,211; SFV = 1,163; SCV = 48)
- Based on 2005 American Community Survey (ACS) of U.S. Census Bureau, San Fernando Valley Census Congressional District (CCD) Tracts have an estimation of
 - 9,970 (21.5%) grandparents responsible for taking care of their own grandchildren under 18 years in households
 - 73,970 (40.8%) population (ages 65 and over) with disability
 - The 2003 California Health Interview Survey indicates that 10.9% older adults (ages 65 or older) fell more than once in the past 12 months and 17.2% of them had incontinence within the past 30 days upon interview were conducted

POOR AND MEDICALLY INDIGENT

Based on responses to the interviews from 37 agencies serving poor and medically indigent population, the key priority areas are as follows:

- Affordable and accessible mental health services (81 points): respondents felt that a) currently there is no mental health services for low income other than psychiatric ER and Social Work; and b) multi-systematic approach should be approached to link mental health services, job training, substance abuse services, and housing assistance for poor and medically indigent population
- Affordable and portable health insurance (62 points): respondents felt that areas need to be aimed at are a) advocacy to increase private public partnership (PPP) programs; b)
- Affordable housing (52 points): respondents felt that more transitional beds in shelters for homeless discharged from the hospital and community based shelters need to be secured to prevent them from returning to the Skid row
- Chronic disease management (46 points)
- Affordable and accessible dental services (42 points)

Demographics:

For the year of 2005

- There were 723,975 households in SPA 2 (647,423 in the San Fernando Valley and 76,552 in Santa Clarita Valley). About 21.82 % (156,089) of the households in SPA 2 reported annual incomes below \$25,000.00 (23.18% in the San Fernando Valley and 10.76% in Santa Clarita Valley). Communities with the highest number of household reported annual incomes below \$25,000.00 in SFV and SCV were:

San Fernando Valley

- Van Nuys (20,340)
- Glendale (19,383)
- North Hollywood (18,232)

Santa Clarita Valley

- Newhall (2,394)
- Canyon Country (2,343)

For the year of 2005

- There were 53,700 families living below poverty level (BPL) in SPA 2 (51,012 in the San Fernando Valley and 2,688 in the Santa Clarita Valley). Communities with the highest number of families reported living below poverty level in SFV and SCV were:

San Fernando Valley

- Van Nuys (10,350)
- Glendale (6,845)
- Pacoima (3,204)

Santa Clarita Valley

- Canyon Country (377)
- Newhall (369)

Public Assistance:

For the year of 2005

- There was a total of 411,572 individuals relied on public assistance through Cal WORKS, General Relief, Refugees, C.A.P.I., M.A.O., I.H.S.S., and food stamps in SPA 2 (392,251 in the San Fernando Valley and 19,321 in the Santa Clarita Valley). Communities with the highest number of public assistance recipients in SFV and SCV were:

San Fernando Valley

- Glendale (52,862)
- Van Nuys (50,317)
- North Hollywood (47,198)

Santa Clarita Valley

- Canyon Country (8,084)
- Newhall (5,507)

COMMON THEMES

Based on a review of the primary and secondary data, the common themes across the target groups are:

- Affordable and accessible mental health services and prevention programs for low-income, homeless, and undocumented individuals and families; and more trained workers to be culturally sensitive and language appropriate
 - Attention-Deficit/Hyperactivity Disorder was the number one diagnosis for children; Major Depressive Disorders and Schizophrenia were the top two diagnoses for adults and seniors
- Advocacy for public policy change for universal health coverage and more clinics accepting subsidized health insurance
 - Across all target groups, the most common diagnosis for ER visits was symptoms, signs and ill-defined conditions (ICD-9 Code: 480-499)
 - For children (age 0-17) and adults (age 18-64), the number one reason admitted to the hospitals was pregnancy and childbirth related diagnoses; the number one reason for hospital admissions was heart failure for seniors (age 60 and older)
- Chronic disease prevention and intervention at early age; and affordable or low-cost medication for individuals with chronic disease(s)
- Housing financial assistance programs for low to middle incomes families and seniors and sufficient transitional housing for homeless, re-entry population, and substance abusers
- Dental prevention programs at early childhood; and low-cost dental services for uninsured and disadvantaged

With our primary investigation, 144 surveys were completed at the return rate of 67.9%. Each participating organization ranked their top five priorities based on the 5-point Likert scale, 1 being the top most priority and 5 being the least priority. Numbers 1 through 5 was assigned a point value (1=5 points, 2=4 points, 3=3 points, 4=2 points, and 5=1 point). Each questions was tallied to be a composite score, the 5 highest scores were selected, which represented the key priorities as demonstrated in the table below. For open-ended questions, a qualitative approach was adopted to provide a narrative synopsis to supplement the point value system. Our key finding indicates that the number one priority is mental health services (287 total points), followed by health insurance (202 total points), chronic disease management (133 total points), affordable housing (131 total points), and dental Care (121 total points).

Table of the point values for the key areas of need according to SPA 2 respondents:

Needs/Issues	Total (N=144)
Affordable and accessible mental health services	287
Affordable and portable health insurance	202
Chronic disease management (e.g. diabetes, asthma)	133
Affordable housing	131
Affordable and Accessible Dental care	121
Case management services for individuals and families	66
Affordable home care and long-term care services	39
Coordination between agencies of programs & services	37

Affordable and Accessible Mental Health

In terms of mental health services, a majority of participating agencies commented that more prevention programs and counseling services should be made affordable and accessible for low-income, homeless, and undocumented individuals and families. Respondents also addressed that agency staff members need to be trained to be culturally sensitive and language appropriate when providing services to mentally vulnerable clients. Respondents indicated that they are lacking of referral ability due to limited resources in the community they served. Health insurance ranked as the second crucial priority that needs to be addressed. Most respondents were prone to advocating for comprehensive universal health coverage, especially more and more employers tend to cut out health benefits. If that's not the case in the near future, respondents expressed that affordable health insurance, removal of pre-existing condition clauses, and free clinic or clinic accepting subsidized health insurance could be other alternatives to prevent the overflow of Emergency Rooms.

Affordable and Portable Access to Health Care

The majority of respondents for agencies serving SPA 2 residents across all target groups felt that it is time for some form of universal health care to cover all populations. In addition, it was felt that additional clinic capacity is needed to serve the uninsured. Fewer respondents suggested less complicated enrollment criteria and paperwork for Medi-Cal and other low cost coverage plans.

Chronic Disease Management

For chronic disease management, asthma, diabetes, and obesity were identified as prevalent diseases that need to be addressed. To prevent diabetes and obesity, respondents suggested that prevention programs about nutrition and exercise should be introduced at an early age in schools; also, outreach education should be provided to parents and at-risk adults at grocery stores. In addition, community-wide physical space should be made accessible and safe for exercise. To prevent asthma and respiratory risks, respondents indicated that air quality and lead testing should be constantly monitored. In addition, affordable or low-cost medication for asthma was specified as another area of concern.

Affordable Housing

In terms of affordable housing, respondents proposed more housing financial assistance programs should be made available for low to middle income families and seniors in case of financial emergency. Besides financial assistance programs, respondents were concerned with the absence of sufficient product housing and emergency/transitional housing for homeless, re-entry population, and substance abusers.

Oral Health

Concerning dental care, respondents advocated for more prevention programs at early childhood as well as low cost dental services for the uninsured and for the disadvantaged.

CONCLUSION

The 2007 Community Needs Assessment has been compiled for hospitals, organizations, and institutions as an information resource for the communities located in Service Planning Area 2 of Los Angeles County. The data collected identifies common needs, issues, and priorities across various segments of the population, as well as those unique to particular ages, genders, and socioeconomic groups within the community. This information provides a foundation for program development, fund development, and strategic planning activities.

This project represents a collaborative effort involving many organizations, groups, and individuals. It is our hope that this spirit of cooperation will continue as organizations identify specific issues in communities that need attention, develop mutual strategies to meet these priorities, and work together to implement programs and services that benefit individuals and families. While the attempt to address common interests should be one catalyst for organizations to collaborate on projects addressing priorities needs in communities, a greater motivation remains the provision of a seamless coordinated system of healthcare for all residents of the communities we serve.

APPENDIX A

Community Needs Assessment: Asset Mapping and Key Needs Participants

COMMUNITY NEEDS ASSESSMENT PARTNERS & PARTICIPATING ORGANIZATIONS

Community participation is vital to the creation of a needs assessment. We appreciate each of the hospitals and organizations listed; they provide unique and invaluable services to SPA 2 residents. The organizations listed below may have assisted with the development and completion of the needs assessment by attendance at monthly planning meetings and/or completed or both the asset mapping survey and key priority needs survey.

We would like to thank the following agencies for participating:

- ◆ AIDS/HIV Health Alternatives
- ◆ All for Health, Health For All
- ◆ Alzheimer's Association
- ◆ American Cancer Society
- ◆ American Health Services
- ◆ Bet Tzedek Legal Services
- ◆ Boys and Girls Club of the San Fernando Valley
- ◆ Brodous Ready for School Resource Center
- ◆ California Family Counseling Center
- ◆ California State University, Northridge
- ◆ Center for a Brand New Day
- ◆ Child & Family Center
- ◆ Children's Planning Council- SPA 2 Council
- ◆ Clinica Medica San Miguel
- ◆ Columbus School Based Clinic
- ◆ Community Clinic Association of Los Angeles
- ◆ Comprehensive Community Health Centers (Glendale & N Hollywood)
- ◆ Cri-Help Inc
- ◆ Del Carmen Medical Center
- ◆ Department of Health Services- Los Angeles County
- ◆ Department of Mental Health – Los Angeles County
- ◆ Department of Public Health – Los Angeles County
- ◆ Department of Public Social Services – Los Angeles County
- ◆ DHS Office of Planning
- ◆ Economic Alliance
- ◆ Neighborhood Legal Services/Health Consumer Center
- ◆ NEVHC -Northeast Valley Health Corporation (SPA 2 sites)
- ◆ NEVHC – Northeast Valley Homeless Clinic
- ◆ NEVHC – Teen Clinic
- ◆ Northridge Family Practice Center
- ◆ Northridge Hospital Medical Center
- ◆ Office of Supervisor Zev Yaroslavsky
- ◆ ONE Generation
- ◆ Ovarian Cancer Coalition
- ◆ Pacific Asian Counseling Services (PACS)
- ◆ Pacoima Beautiful
- ◆ Partners in Care Foundation
- ◆ Project Grad Los Angeles
- ◆ Providence Center for Community Health Improvement
- ◆ Providence Holy Cross Medical Center
- ◆ Providence Saint Joseph Medical Center
- ◆ Providence Senior Outreach
- ◆ Providence Tattoo Removal Program
- ◆ San Fernando Health Center
- ◆ San Fernando Valley Interfaith Council, Inc. (VIC)
- ◆ SFV CMHC Inc., Center for Family Living
- ◆ San Fernando Valley Community Mental Health Center
- ◆ SFVCMHC Homebound Program
- ◆ SFVCMHC, Inc/Central Valley Youth Family Center

Participating Agencies Continued:

- ◆ El Centro de Amistad
- ◆ El Nido Family Center
- ◆ El Proyecto Del Barrio
- ◆ Esperanza Community Housing Corporation
- ◆ Friends Outside Los Angeles
- ◆ Glendale Adventist Medical Center
- ◆ Glendale Health Center
- ◆ Henry Mayo Newhall Memorial Hospital
- ◆ Hillview Mental Health Center
- ◆ Hollywood Community Hospital of Van Nuys
- ◆ J Dunn Project Management
- ◆ Kaiser Foundation Hospital – Panorama City
- ◆ Kaiser Foundation Hospital – Woodland Hills
- ◆ Kid’s Community Dental Clinic
- ◆ LA County Probation – ESFV Area
- ◆ LA Family Housing
- ◆ LA Co Community & Senior Services SCV Service Center
- ◆ LA County Office of Health Assessment and Epidemiology
- ◆ LADHS Homeless Coordinator
- ◆ LA DPH North Hollywood Health Center SPA 2

- ◆ LAUSD District 2
- ◆ Madison Community Collaborative
- ◆ MEND (Meet Each Need with Dignity)
- ◆ Mission City Community Network, Inc.
- ◆ Mission Community Hospital
- ◆ Mission Community Hospital San Fernando Community Campus for Health & Education
- ◆ Santa Clarita Adult Day Health Care Center
- ◆ Sherman Oaks Hospital and Health Center
- ◆ Sherman Oaks SAGE
- ◆ Tarzana Treatment Centers, Inc. (multiple clinic sites)
- ◆ The Help Group
- ◆ The Village Family Services
- ◆ The Village Ready for School Family Resource Center
- ◆ The Wellness Community Valley/Ventura
- ◆ Twin Towers Treatment Center
- ◆ Urban Education Partnership
- ◆ Valley Care Glendale Health Center
- ◆ Valley Care Mid Valley Comprehensive Health Center
- ◆ Valley Care Olive View UCLA Medical Center
- ◆ Valley Care San Fernando Health Center
- ◆ Valley Community Clinic
- ◆ Valley Coordinated Children’s Service (LACDMH)
- ◆ Valley Presbyterian Hospital
- ◆ Valley Trauma Center
- ◆ Vaughn School Based Health Center
- ◆ Verdugo Hills Hospital
- ◆ Verdugo Mental Health Center
- ◆ Volunteer Center of Los Angeles
- ◆ Western pacific Medical Corporation
- ◆ Youth For Positive Change
- ◆ Youth Speak Collective

A detailed resource listing all of the programs and services provided by those organizations that completed the asset mapping worksheet has been compiled and will be added and updated on the Valley Care Community Consortium web site www.valleyccc.org. This resource manual, sorted by service and population target, will be a reference for community organizations and stakeholders.

Valley Care Community Consortium Community Needs Assessment Survey (1= highest priority)

For each target group that your organization serves (Poor and Indigent, Children, Adults, and Seniors) identify the top five needs/issues and rank in priority order

Needs/Issues	Poor and Indigent	Children (Age 0 - 17)	Adults (Age 18-64)	Seniors (Age 65+)
Abuse treatment and prevention (e.g. child, domestic, elder) programs				
After hours medical care (e.g. evenings & weekends) for non-emergent conditions (e.g. urgent care)				
Case management services for individuals and families that are coordinated				
Chronic disease management (e.g. diabetes, asthma)				
Coordination between agencies programs & services in the community				
Cultural issues/barriers to obtaining health care				
Day care services (adult & child) that are affordable				
Dental care o Affordable o Accessible *				
Employment training and job placement programs				
Exercise and physical fitness programs				
Expanded community based services specify:				
Health education programs specify:				
Health insurance that is affordable and portable				
Home care and long-term care services that is affordable				
Housing that is affordable				
Injury and accident prevention programs				
Language and communication issues				
Men's health screening programs (e.g. prostate cancer)				
Mental health services o Affordable o Accessible *				
Nutritional programs				
Optometry services that are affordable				
Pregnancy prevention programs and family planning				
Primary medical services				
Providers who accept Medi-Cal and Healthy Families				
Safe living environment				
Services for persons with developmental disabilities				
Sexually transmitted disease prevention programs				
Specialty medical services(e.g. Orthopedics, Neurology)				
Substance abuse prevention and treatment programs				
Transportation services o Affordable o Reliable *				
Violence and anger management programs				
Wellness, screening and prevention programs				
Women's health screening programs (e.g. osteoporosis, breast cancer, gynecological screenings, etc.)				
Other? (specify)				

*Check if you think the problem is related to affordability, accessibility/reliability or both issues
